DESIGN CONCEPT

Please provide a succinct description of the design concept or idea (not the functional goals).

The design goal is to address functional issues of the building with solutions that create a cohesive, vibrant, warm, and inviting building exterior that emphasizes its identity as a community center while providing a positive visual impact for community improvement and development. The new design elements include:

- Plaza entry improvements to emphasize the building entry as a focal point and community beacon.
- Colorful Brise Soleils to complement exterior as well as reduce heat gain on south facing facades.
- New building identity signage as a design element.

IS THIS PART OF A MULTI-SITE PROJECT, BOND OR CAPITAL IMPROVEMENT PROGRAM?

If yes, which program? SSIP
