The Real Estate Fraud Prosecution Fund was established by California Government Code Section 27388. This code gives the respective counties of California the option of placing a fee upon the recording of certain Real Estate transactions. These fees, after the deduction of administrative costs incurred by the county, are to be used solely for the deterrence, investigation and prosecution of real estate fraud crimes. In the City and County of San Francisco, 10% percent of all fees collected go to the Assessor’s Office for the costs of administering this fund, 54% to the District Attorney’s Office and 36% to the San Francisco Police Department.

The following list gives a brief description of the various real estate fraud cases assigned to the Fraud Detail. These cases were assigned during the reporting period May 2006 – June 2007 for investigation. For this period we have received forty-one (41) cases with a combined reported loss of approximately $27,802.616.50. Due to the complexity of these cases and the fact that investigations from other agencies are often necessary (Adult Protective Services and outside jurisdiction referrals) many of these cases are still being actively investigated with a final determination on each case to be made by the District Attorney’s Office.

A recent arrest concerning a real estate investigation involves a suspect who coerced an elder victim in San Francisco to place him onto the title of his (the victim’s) property. Suspect was warned numerous times by the Public Guardian Office (victim had been conserved years ago) that victim did not have the mental capacity to give the suspect title to the property. The suspect nonetheless took partial control of the victim’s property. Suspect was arrested and this case is currently being pursued by the District Attorney’s Office. This same suspect is currently being investigated on another case in which he has a different elder victim sell her home in San Francisco and purchase several properties in the East Bay that are now in the name of both the victim and suspect.
Another case reported in November 2006 and recently assigned involves the purchase by N.R.L.L. East, LLC, a Florida Corporation, of a block of twenty (20) lots in San Francisco, California. This block of lots are listed as “Salt March and Tide Lands” and must be sold together (as a block). N.R.L.L East LLC purchased this block of lots and then resold these lots together as a block to a subject at a Land Auction in San Mateo, California.

The subject who purchased this block of lots then resold the block of lots to herself via a Corporate Entity she controls and then filed a Deed of Trust with Assignment of Rents at the San Francisco Recorder’s Office. The filed Deed of Trust had no notice that this block of twenty lots MUST BE SOLD TOGETHER AS A BLOCK. This suspect then started selling each of the twenty lots to buyers as individual lots for a price of $75,000.00 to $100,000.00. Purchasers of lots were unaware that they cannot build on them.

While the main use of the Real Estate Trust Funds continues to be for the investigation of criminal complaints, the Fraud detail has also used the monies to send its members to real estate training and to purchase equipment related to the investigation of real estate cases. A complete accounting of all real estate monies from inception of fund is maintained in the Fraud Detail and is available for review at any time to the members of the Committee.

In addition to the criminal investigations, personnel from the Fraud Detail have attended many community meetings and numerous undue influence workshops where the topic of real estate fraud was discussed. A detailed brochure on real estate fraud has been produced and has been given to patrol personnel.

The following pages will detail the budget for fiscal year 2007–2008 and will show actual revenue and expenses for the complete fiscal year 2006–2007. Also shown are the relevant governmental codes authorizing the use of this fund.
