1	DRAFT
2	SAN FRANCISCO ELECTIONS COMMISSION
3	Resolution on Extending the City's Contract with Dominion Voting Systems
4	(Adopted by the San Francisco Elections Commission (X-X) on XXX.)
5	
6	Resolution in support of extending the City and County of San Francisco's
7	contract with Dominion Voting Systems, Inc. for only one year this year, and
8	waiting until next year to decide whether to extend the contract a second year.
9	
10	WHEREAS, The Board of Supervisors ("Board") and Elections Commission
11	("Commission") have a goal of moving towards open source voting systems for the City
12	and County of San Francisco's ("City's") elections;
13	WHEREAS, On February 4, 2022, in support of that goal, the City enacted
14	Ordinance No. 12-22 to implement an open source voting pilot program during the
15	November 8, 2022 Consolidated General Election;
16	WHEREAS, The City's contract with Dominion Voting Systems, Inc. ("Dominion"),

which the Board approved on March 12, 2019 as part of Resolution No. 127-19, was

structured to give the City the option of switching to an open source voting system when

such a system becomes available, by giving the City the option "to renew two times for

WHEREAS, Dominion was the only qualified bidder that responded to the

Department of Elections' February 1, 2018 Request for Proposals ("RFP") that led to the

one year each renewal," and with no penalty for renewing later;

City's current contract with Dominion;

WHEREAS, In the context of a federal court case in the Northern District of
Georgia, Curling v. Raffensperger, a description was recently made public of a sealed
report by University of Michigan Professor Alex Halderman concerning potentially
serious security vulnerabilities in Dominion's ImageCast X voting equipment, a version
of which San Francisco uses as part of its contract;

WHEREAS, It may be several months or more before the City can know whether and how the City is impacted by the vulnerabilities described in the report, because the Court sealed the report due to its sensitive nature and is awaiting its review by the Federal Cybersecurity and Infrastructure Security Agency (CISA);

WHEREAS, In a San Francisco Examiner ("Examiner") article dated November 14, 2021, the Examiner quoted a Dominion Sales Representative for the City as making statements to the Examiner that were inappropriate and disrespectful of the City and its residents, including that "Most people in San Francisco don't care about voting";

WHEREAS, The Sales Representative did not respond to a January 12, 2022 letter from the Commission President inviting him to submit a response regarding these remarks, including any explanation, clarification, or retraction;

WHEREAS, Waiting a year before deciding whether to renew the agreement for a second year will permit the City to conduct the open source voting pilot first and keep open the option of switching to an open source system for the second year, should an open source system become a viable option between now and then; and

WHEREAS, Waiting a year will also, independent of the pilot, provide an incentive for additional vendors to become qualified bidders on future RFP's, which, by promoting competition, would be to the City's advantage, irrespective of whether those vendors are vendors of open source systems; now, therefore, be it

- 1 RESOLVED, That the Commission supports extending the City's contract with
- 2 Dominion for only one year this year, and waiting until next year to decide whether to
- 3 extend the contract for a second year; and, be it
- 4 FURTHER RESOLVED, That the Commission requests that the Director of
- 5 Elections ask the Board to extend the contract only one year this year; and, be it
- 6 FINALLY RESOLVED, That the Commission requests that the Board extend the
- 7 contract only one year this year.
