

North Entrance at Union Square

North Entrance at Union Square

- o Entrance fully integrated with existing plaza
- Articulated façade is sculptural and relates to existing stepped planters
- o Fascia above elevator glazing with vines
- Set-back fascia over entry creates a buffer from sidewalk
- Integration of façade with terraces invites circulation between levels
- Fully glazed elevators promote security and safety
- SFMTA service map on elevator glazing as public information and tie-in with Market Street elevator.

North Entrance at Union Square
