

Jenny Holzer LED Art Project for the Transbay Transit Center

As a result of viewing the Jenny Holzer artwork mockup at the Transbay Transit Center on September 26th, we propose to increase the vertical height of the artwork to 15 feet, which is an increase of 4 feet and to extend the length of the artwork to approximately 173 feet. This means that the total proposed length of the artwork extension will be less than the 200 linear feet stipulated in the Arts Commission's resolution to approve the contract modification with Kiboworks, the LED fabricator. The artist and the project architects, Pelli Clark Pelli support this change. Commissioners Beltran and Keehn viewed the mockup and had indicated that they would support increasing the height of the artwork. The total square footage of the artwork, with its new extension will be the same as that proposed with the 200 linear feet increase.

Motion: Motion to rescind RESOLUTION NO. 1002-17-261 Motion to authorize a \$600,000 increase of the contract with Kiboworks to extend the linear footage of the Jenny Holzer artwork at the Transbay Transit Center by 110 linear feet for a new total linear footage of 200 feet and a contract amount not to exceed \$1,340,000.

Motion to approve a \$600,000 increase to the contract with Kiboworks, Inc. to increase the height of the Jenny Holzer LED artwork at the Transbay Transit Center to a maximum of 15 feet and the length of the artwork to a new total ranging from 173 and 200 linear feet. The total amount of the contract with Kiboworks shall not exceed \$1,340,000.
