

Source Imagery

These images will be printed on archival paper roughly 7.5 ft tall by 5.5 ft wide with archival inks. The prints will be cut into 3/8" inch wide strips. They will then be woven by hand together. The project will take approximately 3 months to complete.

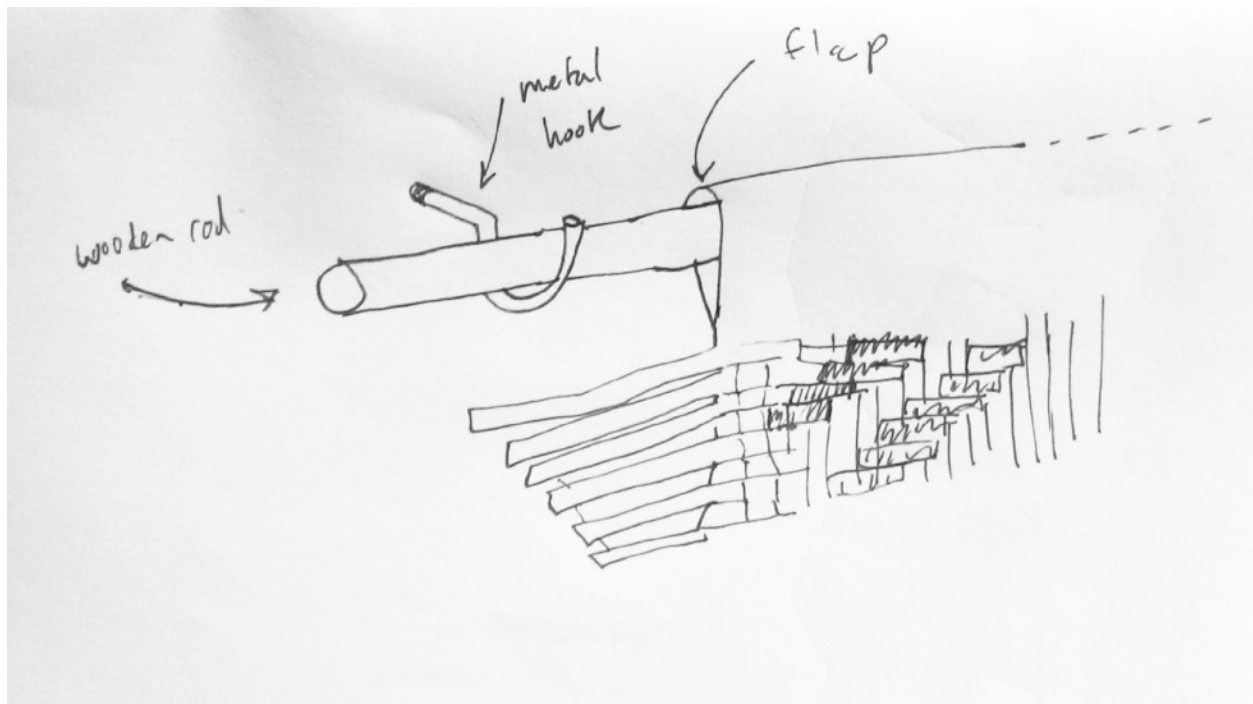

Proposed Design

Project Budget: \$25,000

Fabrication Details:

At the margins of the weaving the strips will be glued with acid-free PVA glue to prevent the work from unraveling. At the top of the weaving a paper flap will be glued through which a wooden rod will be inserted for hanging. Small hooks are adequate to support the weight of the piece, which will be less than 10 lbs. The hooks could be installed on a backing board with the piece floating about an inch and a UV-plexi frame securing it.
