

8.16.17 Visual Arts Committee Explanatory Document

Jenny Holzer Project at Transbay Transit Center

The Intergovernmental Agreement between the SFAC and Transbay Joint Powers Authority was modified last year to authorize the SFAC to manage a contract not to exceed \$740,000 with Kiboworks for the fabrication and mounting of a LED artwork designed by Jenny Holzer for the bus deck mezzanine of the Transbay Transit Center. This amount of funding would allow for 90 linear feet of the LED artwork, although the artist's original intent was to have the artwork completely surround the bus deck at a length of 352 feet. The TJPA has now identified \$600,000 in additional funding for the artwork which will allow for an increase of another 110 linear feet bringing the total length of the artwork to 200 linear feet.

Through an action of the TJPA board, Transbay will be authorized to transfer this funding to the SFAC to increase the contract with Kiboworks to a total amount not to exceed \$1,340,000.
