

BRIEF(S) SUBMITTED BY RESPONDENT DEPARTMENT(S)

Board of Appeals Brief

Date: June 3, 2021
Hearing Date: June 9, 2021
Appeal No.: 21-035
Address: 2722-2724 Folsom Street
Block/Lot: 3641 / 002
Zoning/Height: RH-2 (Residential – House, Two-Family)
40-X Height and Bulk District
Staff Contact: Scott Sanchez, (628) 652-7320 or scott.sanchez@sfgov.org

INTRODUCTION

This appeal arises from the permit applicant’s refusal to correct inconsistencies between the permit applications at issue and the existing conditions at the subject property. The Appellant goes even further, arguing that it can merge an Unauthorized Dwelling Unit (UDU) into an existing legal dwelling unit by simply changing the label on its permit plans from “kitchen” to “laundry” without benefit of proper permits or the required Conditional Use Authorization (CUA) under Planning Code Section 317¹. But this argument is inconsistent with both the Planning Code, and the prior admissions of Appellant’s counsel in a related appeal to this Board. Because the Appellant has refused to correct the violation by providing accurate information to correct inconsistencies between its permit applications and the site conditions relating to a kitchen in the UDU at the property, the Board should deny the appeal and uphold the Suspension Request.

On April 9, 2021, Ryan Patterson on behalf of Michael Turon (Appellant) filed Appeal No. 21-035 appealing the Acting Zoning Administrator’s issuance of a Suspension Request for Building Permit Application (BPA) Nos. 202006118414 and 202010055941 (Permits) for the property at 2722-2724 Folsom Street (Property).

¹ Pursuant to Planning Code Section 317, a CUA is required for merger, conversion or demolition of a legal dwelling unit or removal of a UDU. The findings differ for each and are outlined in Planning Code Section 317(g).

The Suspension Request identified specific inconsistencies between the existing conditions as shown on the Permits with those shown on prior permits and provided the Appellant with time to address those inconsistencies and correct any resulting misrepresentation in the permit applications. The Appellant has failed to demonstrate that the Acting Zoning Administrator erred or abused their discretion in issuing the Suspension Request, failed to demonstrate that the subject permits were properly issued, and refuses to provide the Zoning Administrator with corrected permit documents reflecting the existing project conditions.

PROPERTY INFORMATION

The Property is located at 2722-2724 Folsom Street within the RH-2 Zoning District and 40-X Height and Bulk District. The subject building was constructed circa 1896 and contains 4,375 square feet (per Assessor's records) and two legal dwelling units. Prior to 2019, records of the Department of Building Inspection (DBI) indicated that the Property contained three legal dwelling units. Following additional research of the Property's permit history, DBI corrected the record and the Appellant obtained a permit to document that the Property contains two legal dwelling units.

Since 2016, the property owner has sought more than 25 building permits for the Property (Exhibit A). In 2017, the Property owner sought a CUA from the Planning Commission to merge two dwelling units on the ground floor of the Property (at that time DBI records indicated the property contained three legal dwelling units). The Commission denied that CUA. After a fire damaged a kitchen in one of the ground floor dwelling units in 2018, the Appellant subsequently applied for and then withdrew two separate building permits that referenced removal of the kitchen. By the permits at issue here, the Appellant seeks to obtain the result previously denied by the Commission by simply relabeling its building plans from "kitchen" to "laundry" without benefit of proper permits or the required CUA.

BACKGROUND

In 2016, DBI records indicated the property contained three legal dwelling units.

On February 8, 2016, the Appellant submitted BPA No. 201602089084 to merge the two ground floor dwelling units on the Property, reducing the number of dwelling units on the Property from three to two (one on the ground floor and one on the first floor). Such merger required a CUA under Planning Code Section 317. This permit was withdrawn on February 24, 2016.

On March 3, 2016, the Appellant filed a CUA application pursuant to Section 317 to merge the two ground floor dwelling units on the Property (Case No. 2016-002914CUA).

On March 10, 2016, the Appellant submitted BPA No. 201603101720 to merge the two ground floor dwelling units on the Property.

On December 21, 2017, the Planning Commission held a public hearing on Case No. 2016-002914CUA and denied the request to merge the two ground floor dwelling units (Motion No. 20084). Plans on file with this case identified 2724 Folsom Street #A as the “Front Ground Unit” and 2724 Folsom Street #B as the “Back Ground Unit.” As shown on the plans, each unit had its own entrance, kitchen, and bathing facilities (Exhibit B). Based upon their application, both units were occupied at the time of the application.

On January 22, 2018, the Appellant attempted to appeal the Planning Commission’s denial of the CUA to the Board of Supervisors.

On January 26, 2018, the Board of Supervisors indicated that the attempted appeal of the CUA did not meet the requirements of Planning Code Section 308.1, which establishes thresholds for when a CUA appeal may be accepted and heard by the Board of Supervisors.

On February 17, 2018, a fire occurred in the kitchen of the Front Ground Unit.

On February 21, 2018, DBI issued NOV 201842471 (Exhibit 12 of Appellant’s Brief) to document the fire and noting damage to wall and ceiling finishes and no structural damage.

On March 23, 2018, the Appellant submitted the following two building permit applications:

- 1) BPA No. 201803234527 to comply with NOV 201842471 to perform fire damage repairs and “remove unpermitted kitchen in front area of 1st fl unit” (Front Ground Unit). This permit was withdrawn on June 10, 2019.
- 2) BPA No. 201803234544 to document the legal use of the building as containing two dwelling units. The permit was subsequently denied by the DBI, whose records indicated the legal use of the building as containing three dwelling units.

On July 2, 2018, the Appellant appealed the denial of BPA No. 201803234544 to the Board of Appeals (Appeal No. 18-093).

On October 10, 2018, the Board of Appeals held public hearing on Appeal No. 18-093. At this hearing, the Appellant argued that the Property contained two legal dwelling units, not three legal dwelling units as indicated in DBI records. At this hearing, the Planning Department noted that even if the Board granted the appeal and found the Property contained two legal dwelling units, a CUA would be required for the removal of a UDU pursuant to Planning Code Section 317 if the Appellant sought to retain only the two legal dwelling units on the Property. In response, the Appellant’s attorney (Ryan Patterson) acknowledged this prospect and stated the following:

“First off, the Zoning Administrator's comment that even if the Board were to overturn this denial and issue the permit then we would have to go into the Section 317 process. I think that’s correct. And the answer is the Board should overturn the denial and then we go into this Section 317 process. And Planning can decide if they want to seek legalization as an ADU or what not. That is the appropriate process to be going through. The question of whether there's an assumption of this unit being lawful or not, based on lack of evidence, there's a lot of evidence showing that this is not a lawful unit here. So that's the right process and if you overturn the denial, you are not sentencing this unit to disappear forever.”

At the close of the hearing, the Board upheld the denial of BPA No. 201803234544, which confirmed the legal use of the property as containing three dwelling units.

On May 21, 2019, following additional review of their records, DBI issued BPA No. 201905211330 to document the legal use of the building as containing two dwelling units to correct errors on previously issued permits from 1975 to present. This permit was for administrative purposes only and did not include any plans of the building.

On August 2, 2019, the Appellant submitted BPA No. 201908027791 to comply with DBI NOV 201842471 to perform fire damage repairs. This scope of work also stated: “not reinstalling 2nd kitchen which was destroyed by fire at northeast of the 1st floor unit” (Front Ground Unit). This permit was withdrawn by the Appellant on March 4, 2020.

On March 6, 2020, the Appellant submitted BPA No. 20200306357 to comply with NOV 201842471 to perform fire damage repairs and install new sheetrock with no structural work. Notably, this permit omitted key language found in previous permits regarding removal of the kitchen in the Front Ground Unit. In reviewing this permit, then-Senior Building Inspector Joseph Duffy asked the Appellant to specify the area of the building in which they were doing the work, to which they replied the laundry area. In response, Mr. Duffy noted that the work would be done in the laundry area. This permit did not include any plans and did not authorize the removal or change in use of the kitchen.

On June 11, 2020, the Appellant submitted BPA No. 202006118414 to repair fire damage and remodel the ground floor of the subject property. On this permit, the kitchen for the Front Ground Unit is shown as an existing laundry room. No permit was issued that authorizes the removal of this kitchen and its replacement with a laundry room. As such, the plans on file with BPA No. 202006118414 misrepresent the existing conditions of the subject property.

On October 5, 2020, the Appellant submitted BPA No. 202010055941 to revise BPA No. 202006118414 to alter the proposed floor plan. On this permit, the kitchen for the Front Ground Unit is still shown as an existing laundry room. No permit was issued that authorizes the removal of this kitchen and its replacement

with a laundry room. As such, the plans on file with BPA No. 202010055941 misrepresent the existing conditions of the subject property.

On April 8, 2021, the Acting Zoning Administrator issued a Suspension Request for the Permits due to inconsistencies between the existing conditions as shown on the Permits with those shown on prior permits and provided the Appellant with time to address those inconsistencies and correct any misrepresentations of these conditions caused by the plan inconsistencies.

On April 9, 2021, the Appellant filed Appeal No. 21-035.

On April 16, 2021, the Appellant's attorney submitted a letter to the Planning Department in response to the Suspension Request. In discussing the change from "kitchen" to "laundry" identified in the Suspension Request, counsel stated that BPA No. 202003066357 "changed any such room designation to 'laundry'." In support of this argument, they cited the fact that the permit was reviewed by then-Senior Inspector Joseph Duffy at DBI who wrote "all work in Laundry area only. 90 sq ft s/rock replacement, approx."

On April 30, 2021, Acting Chief Building Inspector Joseph Duffy wrote an email to the Appellant's attorney (Exhibit C) stating unequivocally that BPA No. 202003066357 "did not authorize the space to be designated as a laundry area." Further, Mr. Duffy stated that this language was added to the permit because he had asked the Appellant to specify the area of the building in which they were doing the work in order to provide information missing from the application, to which they replied the laundry area.

ISSUES ON APPEAL

A. Appellant Has Not Obtained a CUA to Remove the UDU at the Property.

On May 20, 2021, the Appellant filed a brief for Appeal No. 21-035. Appellant's brief fails to show that the Acting Zoning Administrator erred or abused their discretion in issuing the Suspension Request and failed to demonstrate that the subject permits were properly issued.

The Appellant argues that BPA No. 202003066357 authorized the change in designation of the kitchen to a laundry; however, this is incorrect. In fact, on April 30, 2021, Acting Chief Building Inspector Duffy informed the Appellant’s attorney that this permit “did not authorize the space to be designated as a laundry area.” Despite receiving this information three weeks before submitting their brief, the Appellant failed to provide any response to DBI’s determination. The Appellant also failed to provide any other evidence of a permit authorizing a change from kitchen to laundry. Instead, the only permit applications that referenced removal of the previous kitchen (BPA No. 201908027791 [WITHDRAWN] and BPA No, 201803234527 [WITHDRAWN]) were withdrawn by Appellant. (See Exhibit A)

In support of its argument that it has already received authorization to remove the third kitchen, the Appellant argues that the Property legally contains two dwelling units. But this fact is not in dispute. The issue is that the unauthorized removal of the kitchen in the Front Ground Unit results in the removal of a UDU. In order to remove a UDU, Appellant must first obtain a CUA under Planning Code Section 317. This is confirmed by the Appellant’s own attorney in testimony offered before the Board of Appeals on October 10, 2018. In that testimony, Mr. Patterson conceded on behalf of Appellant that, even if the property was found to contain only two legal dwelling units, removal of the third unit would require a CUA under Section 317. In this case, the Appellant has not sought the required CUA to remove the UDU.

B. The Previous Lawsuit and Pending Permits are Irrelevant to This Appeal.

In their brief, the Appellant cites several documents that are irrelevant to the issues presented here. First, Appellant refers to a Stipulated Dismissal associated with a previous lawsuit. It is noted that the stipulation does not include any determinations allowing the removal of the kitchen in the Front Ground unit, the change in designation of the kitchen to laundry, or the removal of a UDU. Instead, the stipulation merely reflects the now undisputed fact that the property contains two legal units. It does not take any position regarding the legal status of the UDU, but merely notes that a fire had occurred in its kitchen. The Appellant

also cites recent activity on BPA No. 201807063908 (Garage Permit); however, the instant appeal does not involve this permit.

C. Appellant Cannot Obtain Vested Rights to a Permit Issued Based on Misrepresented Site Conditions.

The Appellant argues that they have vested rights to the Permits; this is incorrect. To establish vested rights in a permit, a plaintiff must prove it has performed substantial work and incurred substantial liabilities in good faith reliance upon a validly issued governmental permit. (*Avco Community Developers, Inc. v. South Coast Regional Com.* (1976) 17 Cal.3d 785, 791.) Appellant cannot claim good faith reliance on a permit that was issued on the basis of misrepresentations in its permit application. (See *Stokes v. Board of Permit Appeals* (1997) 52 Cal.App.4th 1348, 1353; *Autopsy/Post Services, Inc. v. City of Los Angeles* (2005) 129 Cal.App.4th 521, 523 [no vested right to use building for performing autopsies where permit applications never revealed that proposed use].) Here, the Permits misrepresent the existing ground floor conditions on the Property by showing a second ground floor kitchen as a laundry room. The Appellant argues that a separate permit changed the room designation from “kitchen” to “laundry”; however, the referenced permit makes no mention of this change and DBI has confirmed that this permit could not have authorized such a change. Whether these misrepresentations were intentional or not is irrelevant. The simple fact is that Appellant cannot establish good faith reliance on permits that were obtained on the basis of misrepresentations of site conditions.

CONCLUSION

In light of the foregoing, the Planning Department respectfully requests that the Board of Appeals deny the appeal and uphold the Acting Zoning Administrator’s Suspension Request for the Property.

Exhibit C

Subject: 2722 -2724 Folsom St. Letter.

Date: Friday, April 30, 2021 at 7:26:28 PM Pacific Daylight Time

From: Duffy, Joseph (DBI)

To: ryan@zfplaw.com

CC: Sanchez, Scott (CPC)

Hi Ryan.

I hope that you are keeping well. I am contacting you regarding a letter written by you that I was copied on dated April 16th 2021 .The letter is in regards to a suspension request from the SF Planning Department at 2722-2724 Folsom St. In the letter you reference a building permit 202003066357 and particularly some actions that were taken by me when I reviewed the building permit with the owner Mr. Turon at the DBI counter at 1660 Mission St 3rd floor on March 6th 2020.

Mr. Turon was obtaining a no plans building permit for fire damage repair and install new sheetrock in NE Corner only .At the time I was processing the permit on behalf of BID due to an active complaint on the property. I asked Mr. Turon in what area he was doing the work and he said it was in the laundry area. I did not question his answer however I did write it onto the permit based on his reply to my question "All work in Laundry Area only" It is not uncommon for me to ask a customer which area of a building the work is taking place. That information is helpful to our field building inspectors. In your letter you state that this building permit authorized and changed the designation of the room to laundry.

I think you know that as a Senior Building Inspector at DBI Inspection division I do not have the authority to approve changes to room designations .That process would involve filing a building permit with plans and the permit documents would be subject to review by SF Planning and DBI and perhaps other city agencies.

The application that you reference was a no plans permit and just because I was helping a customer fill out some relevant information that he had omitted from the description of work would not mean that I was authorizing the use of the room as a laundry area. If that was the case I would imagine a lot of customer would be lining up to see me. I took Mr. Turon's word for it and a lot of times that is how a permit is issued based on the information supplied by the applicant.

The "abatement "permit 202003066357 did not authorize the space to be designated as a laundry area. I hope that you resolve the issues on the property with the Planning department and I have been in contact with Mr. Turon as he had a question about work that he wanted to continue with on permits that were not suspended.

Thank you and take care.

Joe

Dear Board of Appeals,

I have owned and occupied my home in the Mission district of San Francisco since 2009, and have resided in the Mission district since 2001.

I am submitting this letter of support for the Appellant in Case No. 21-035.

I have known members of the Appellant's family for over seven years, and attended their wedding at Foreign Cinema.

Michael and Lauren Turon are upstanding members of the Mission Community, and staunch supporters of our neighborhood.

I am very familiar with the hurdles they have encountered with their property; I previously wrote a letter to the Board regarding their property back in Oct. 2018 (See Case No. 18-093).

It appears that the Planning Department has erred in its suspension request based on the building permit history and the documents recorded on the property. Given these supporting public records, it is also clear that the Appellant in no way "misrepresented" the plans associated with the permits under the suspension request.

The Appellant has engaged in the fire repairs in good faith and under the approval of the city. The Appellant has invested a significant amount of time (7 months) and money (\$400,000+) in making these repairs under the City's approval. They are entitled to complete the work.

Please reinstate the permits and allow for the Appellant's family to finish the repairs to their family home.

Respectfully,

Tammie Presser
2208 Mission St. No. 407
San Francisco, CA 94110

To whom it may concern:

My name is Saul Anaya and I have been a resident of San Francisco and lived on Folsom street since 1964. I have known Michael since he purchased his home back in 2007. I have become closer with him and his family since the pandemic started. Michael and Lauren are very good neighbors who contribute to the beauty and safety of our block and the community.

I was exceptionally sad to hear from Michael and Lauren that they had to pause the repairs on their home this past April. I have seen how much time and effort they have been putting into their repairs during the COVID-19 pandemic. I was surprised to hear that the City asked that the repair work be paused because it believes a room was mislabeled in the permit plans.

Michael shared with me his submission to you. He also shared the completed March 2020 permit where the disputed mislabeled room is labeled as a “Laundry” room.

It looks like that the room is correctly labeled (as “Laundry”) and the City’s own records support this fact.

I hope you all see this as well and allow Michael and Lauren to resume repairs on their home. I would hate to lose them as neighbors and it would be a great loss to the community as a whole because they are unable to complete their repairs.

Best,

Saul Anaya
2712 Folsom St.

Dear Board of Appeals,

I have been living in San Francisco as a renter in the Mission district for 9 years. I befriended Michael and Lauren shortly after they were displaced by a fire destroyed their home.

I have reviewed the brief and the facts Michael submitted earlier to you. Upon my review, it is clear that the Planning Department erred and overlooked several key public documents when it made submitted the Suspension Request; rendering their concerns around inconsistent labels moot.

The evidence submitted also show that Michael and Lauren submitted their permits in good-faith and based on the legal history of the property.

Please rescind the Planning Departments Suspension Request and allow the Appellant to complete repairs to the property.

Respectfully,

Janice Tam, Esq.

Date: Wednesday, June 2, 2021 9:40:47 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

To Whom It May Concern:

I have come to know Michael Turon as a neighbor of a property I own and as a professional I've had the pleasure of working with. I am acquainted with the incredibly frustrating situation he's working to resolve with the city and am writing to voice my concern and opinion as an owner of a neighboring property.

Please rescind the Planning Department's erroneously issued Suspension Request regarding Case No 21-035 at 2722-2724 Folsom St. To my knowledge, there is no supporting evidence to the concerns raised by the Planning Department in this action. No CCSF department should have the right to stop work on properly reviewed and issued permits outside of the authority clearly established in its rules and regulations. It strikes me as only fair to allow Michael and his wife to continue work on their property under the permits already issued by CCSF.

Kindly,

Nicholas (Niko) Klein
Owner of 2519 Harrison St

Board of Appeals,

I am a resident of San Francisco, who has been living in the City for 20 years with my family.

I have personally known the Appellant and his family for nearly two decades.

The continuous hurdles the City is throwing in front of Michael and his family to repair their fire

damaged home is crazy, especially in light a a few of the following:

- * Housing Crises: In the midst of a housing crisis, the City is delaying viable units from returning to the housing stock.
- * Poor Resource Management: Numerous hours of CCSF employees' time has been wasted on this one property; even after an agreement has been struck with the City Attorney's office.
- * Public Record: The public record shows that the Planning Department erred in its suspension request, yet more resources are getting poured into this hearing.
- * Vested Rights: The Appellant has performed a significant amount of work under the CCSF approved permits (which includes Planning approval); the permits are vested and Appellant has a legal right to complete the work.

I ask that the Members of the Board vote to rescind the suspension request, and allow the Appellant to complete the repairs to their family home.

Best,
Ross Cohen

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Board of Appeals,

This is a letter of support for the Appellant in Case No. 21-035.

I have known Michael (“Appellant”) and his family for several years; they were our neighbors for nearly two years after the fire occurred at their home in 2018.

I am familiar with the appellant’s continuous efforts, over the last three years, of working with the City to correct the building records in order to start repairs on their fire damaged home. I was excited to hear that the appellant had finally received a permit to repair the fire damage in early September, 2020.

I was saddened to hear that the Planning Department requested a suspension of the appellant’s fire repair permit – seven months after construction had started. Michael and his family have invested a lot of time and money in the construction based on the City approved permits.

After reviewing the appellant’s brief, it has become clear to me that the Planning Department erred in its request; the Planning Department’s suspension request is incorrectly based on unissued plans that were submitted nearly 3 years ago (July 2018). The department’s claim is based on inaccurate and outdated plans; the plans that were submitted and approved by the City are accurate and reflect the existing conditions.

This suspension request was done in error - the appellant’s permit plans are accurate and fully supported by the past completed permits.

I am writing this letter to ask that the Board rescind the erroneous suspension request (based on the legal permit history) and re-instate the permits to allow Michael and his family to repair their home.

Best,

Sian Townsend

Members of the Board:

I have been living in the Mission as a renter for 3 years. When I moved here, Michael and Lauren helped secure my apartment by meeting my landlord and doing a walkthrough on my behalf. They are more than just kind and helpful people--they are assets to the Mission community.

When I heard that their construction was put on pause, I was devastated. I have been watching the amount of time and care they have been putting into repairing their home during COVID-19 and beyond.

Based on my review of the materials, it appears that the reason for the Suspension Request has been addressed. I am writing to ask that the Board lift the suspension and allow Michael and Lauren to complete their repairs.

Best,
Katie Bailey

Board of Appeals
San Francisco Planning Department
49 South Van Ness Ave, Suite 1400
San Francisco, CA 94103

Subject: Permit Suspension
2722-2724 Folsom St
San Francisco, CA 94110

Members of the Board of Appeals:

I have been working in San Francisco as a licensed professional engineer since 2010; I am very familiar with the complexity of the permit process in San Francisco. I do not believe the plans associated with the Fire Repair and Seismic Retrofit permits of this property have been mislabeled nor misrepresented.

The existing area labeled as "Laundry" in the above-mentioned plans was given its existing designation after work was completed and finalized by DBI under Permit No. 2020-0306-6357.

The former unpermitted kitchen was destroyed in a fire. Its destruction by the fire is documented in DBI's records, both in the recently recorded NSR (Doc. No. K897774) on the property and in the Fire NOV (No. 201842471); the NOV actually explicitly directs the Appellant to "Obtain Building Permit to Perform Fire Damage Repairs. Do not occupy kitchen".

The decision to suspend the permits was based on a set of superseded plans and does not account for more recently issued, and completed, permits; rendering the basis of the Suspension Request moot.

The approved permit plans as submitted are correctly labeled and based on the exhaustively documented legal permit history of the building. Furthermore, the Appellant has completed, in good faith, a significant amount of work on the approved permits, and under the authority of CCSF.

The Appellant has invested considerable time and investment through the years disentangling the use and permit history of this building and I see no reason how this permit suspension benefits the public good. Please remove the permit suspensions and allow the Appellant to complete the repairs.

Sincerely,

Matthew Coelho, P.E., LEED® AP

Dear Board of Appeals,

I wrote to you previously supporting the Appellant on October 3, 2018 (Ref. Case No. 18-093). I am writing to you again to support Michael.

The Suspension Request submitted by the Planning Department has been erroneously issued; the permit history of the property refutes the reasons outlined by the Planning Department in the Suspension Request.

Please lift the Suspension Request and allow Michael and Lauren's to complete repairs on their property.

Sincerely,

Justin Godar

Members of the Board of Appeals,

Over the course of pandemic, I have befriended Michael and Lauren. They have been valuable members of our "COVID pod".

In the course of the last 12 months, I have observed the struggles Michael's family has gone through to repair their home; including the details around the settlement with the City Attorney's office to documenting the destruction of the unpermitted kitchen and the subsequent completed permits labeling it the former areas as "Laundry". I was happy to hear that repairs started at the Appellate's home in September, 2020.

I thought Michael's long journey to repair his family's home was coming to an end in March, and was surprised to learn that the City requested that the work be stopped in April.

I was surprised that the requesting department made no attempt to contact Michael to get clarification on the issued permits, but rather, resorted to a rather extreme action of suspending the permits with zero discussion.

It appears to me that the city erred and did not account for the various public records refuting the City Department's claim of "misrepresentation". Rather, it exposed the diligence Michael went through to follow and document the process.

I hope the Board sees this. I also hope the Board see's the amount of time and money Michael and his family have invested in repair their home based on the Approved permits from the City.

Please remove the erroneous suspension on the Appellee's property and allow his family to complete repairs on their home.

Best,

Vas

Date: Thursday, June 3, 2021 3:14:10 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Members of the Board:

This letter is in regards to Case No. 21-035.

I met Michael and Lauren Turon several years ago and have been watching their journey to repair their home in San Francisco after a fire caused damage. Recently, I learned that their repairs were abruptly halted after 7 months of construction because the Planning Department believes that the approved permit plans might have some inconsistent in-room labels. The Planning Department's claims appear to be unsubstantiated based on the provided facts and public record.

I find the Planning Department's action in this case puzzling and counterproductive.

Considering the housing shortage in the area, wouldn't it be more beneficial for the City to be working with the property owner to get units repaired and rehabilitated? Shouldn't the City be required to start a dialogue with a property owner and conduct a formal fact-finding mission prior to filing a Suspension Request?

These are the facts of this case: There was a fire at the property. The owner followed the City processes and applied for permits. The permits were reviewed and issued (including by Planning). The owner commenced work to repair their property. Significant work was performed, thus vesting the permits issued by the City. The owner should now have a legal right to complete the work.

I hope the Board reviews the facts in this case, concludes that there were no bad-faith actions surrounding the issuance of the permits, and votes to allow the Appellate to complete their repairs.

The City should not make it so difficult for people to repair their homes after a calamity; they should be working to streamline the process to enable people to move back into their homes.

Respectfully,

Shauna Gallegos

Subject: Letter of Support for Michael Turon
Date: Thursday, June 3, 2021 4:02:35 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Board,

I have lived across the street from Michael at 2709 Folsom Street since Michael and his family purchased the property in 2007. I purchased my house in 2002 and feel that Michael and Lauren are excellent neighbors and have been great additions to our community and wish there were more people like them on our street..

I ask that you move to release the suspension on Michael and Lauren's property and allow them to finish their fire repair.

They have been working diligently for the last seven months (during COVID-19) to repair their building after it was damaged in a fire started by a former tenant.

I do not see any evidence that Michael and Lauren submitted faulty (or deceptive) plans to the City; there is no legal justification for the suspension request. In fact, this raises my concerns about if I should improve my property, as I have frequently thought about doing. I have long heard that doing these projects in San Francisco is onerous and driving people out of the city and this seems to be yet another example of this.

Please remove the suspension, and allow them to rebuild their fire damaged property. I am eagerly awaiting this hearing and the decision as it will directly impact my day to day life on Folsom Street.

Thank you,

Mathew Nelson

June 3, 2020

Re: Appeal No. Case No. 21-035 for 2722-2724 Folsom Street

Members of the Board of Appeals,

I have lived in the Mission since 2005. My wife and two children own and live at 2720 Bryant St., a few blocks away Michael and Lauren's home.

Michael and I met through our volunteer efforts at a SF based 501(c)(3) focused on Historical Preservation.

I have reviewed the Michael's brief submission. I ask Members of the Board of the Appeals to vote to approve Appeal No. 21-035 for the following reasons:

- The stated reason to mitigate the Suspension Request is "to allow time for the Permit Holder to address the inconsistencies between the existing conditions shown on the subject permits and prior permits"; specifically, "the area now shown as a laundry room"
- It appears that the Planning Department erred by overlooking a completed building permit, Permit Application No. 2020/0306/6357, which states "All work in Laundry area only" which was inspected and provided a final approval.
- Considering the completed scope of work in Permit Application No. 2020/0306/6357, which establishes the existing conditions expressed in the subject permits of this hearing, the Suspension Request is now moot.

The evidence and CCSF records in this case are convincing, and there do not appear to be inconsistencies in the approved plans that warrant the Suspension Request remain in effect.

I respectfully request that the Suspension Request be lifted and for the approved permitted work to continue.

Sincerely,

Rob Thomson

From: [Doug McDowell](#)

Subject: Case No 21-035
Date: Friday, June 4, 2021 9:13:04 AM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Members of the Board of Appeals,

My name is Doug McDowell and I live at 2774 Folsom St. with my wife and two teenage children. I live a few house down from Michael Turon; we live on the same side of the block.

I wrote to you back in 2018, when Michael and Lauren had started the process of obtaining permits to repair their home; I was actually one of the neighbors who called Michael when the fire started. He was out of town for a wake during President Day weekend.

I have been following Michael's efforts for the last three years and have witnessed, firsthand, the efforts he has gone through with various CCSF Departments to get permits to repair his home.

The recently issued Suspension Request appear to be a superficial.

Upon review, I do not see any errors in the CCSF approved permits. Would you please explain?

I ask that the Members of the Board of Appeals move to release the Suspension Request and allow Michael to complete his repairs. This action is causing hardship for a neighbor and friend.

Sincerely,

Doug McDowell

(415) 610-1620

SF Appeals 21-035

2722-2724 Folsom St., M. Turon owner

Complaint: The front exterior stairs appears to be demolished and rebuilt and are now a significant encroachment onto the sidewalk of Folsom St. They are a severe tripping hazard. This appears to be unpermitted new work. Exceeds explicit scope of #202012211404.

I want to express my adamant support for **DENIAL of the applicants request** to overturn the suspension.

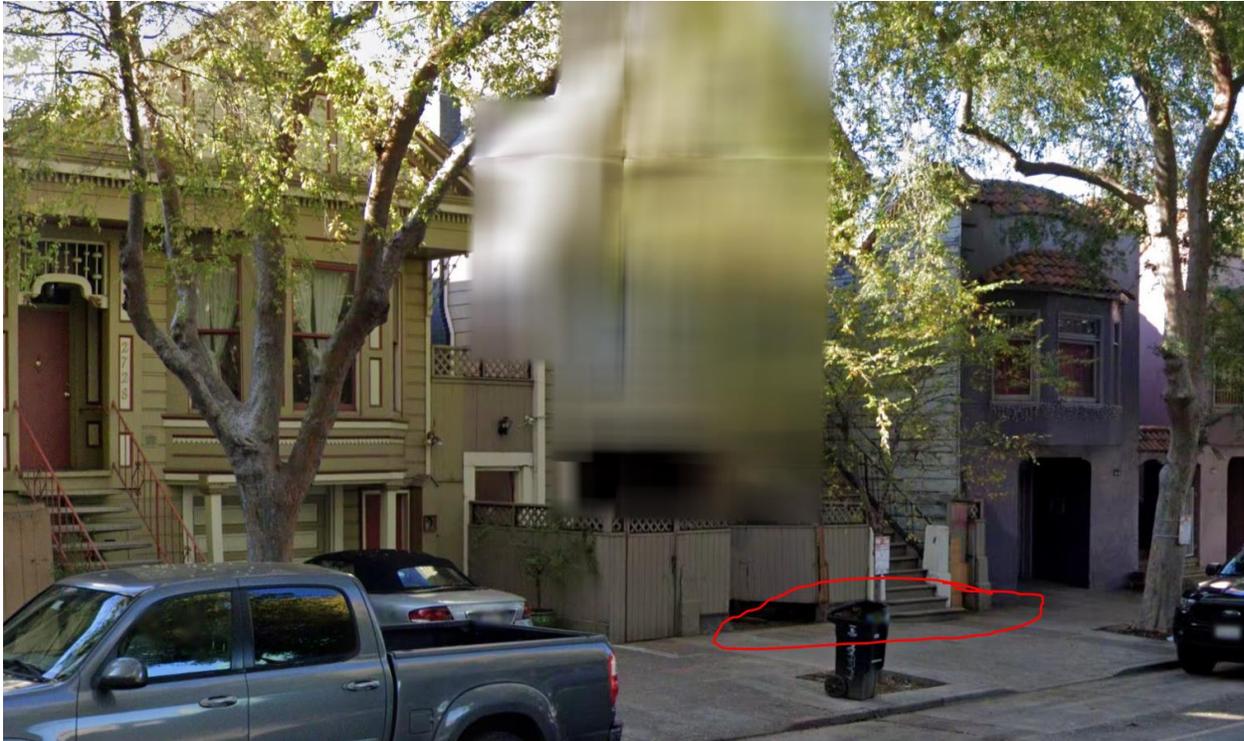

The SF Planning Department has been fair and transparent and yet Mr. Turon believes he is above the law for all residents. Mr. Turon is using the DBI acceptance of specific inspections to 'pretend' that a larger and more inclusive entitlement has been approved. He is trying set-up DBI up against SF Planning and make it look like he is an innocent home owner and not the scoundrel that he is.

Behold the tripping hazard he has placed onto a public sidewalk. He will soon pretend that he has a right to extend his new stairs unto the sidewalk because of irrational belief and that the structure under the stairs was inspected by DBI as 'proof' he was approved to do this.

He doesn't stop. This is the nature of a scoundrel that wastes Board members time, that wastes Planning Staff and DBI time with unsupported claims. For the sake of fairness to all that follow our complicated process please reach the just and natural conclusion to send a message to cheaters.

Per Google street: We observe the lowest tread is few inches beyond the property line previously

This is a brand new staircase and the riser height at the front property line is significantly higher than it was resulting in a new encroachment onto the sidewalk. The newel posts have been reconstructed and raised in spite of prohibition to encroach as per # 202012211404. Mr. Turon doesn't care. He will do as he pleases again.

Description:

Step	Station	Arrive	Start	In Hold	Out Hold	Finish	Checked By	Hold Description
1	INTAKE	12/21/20	12/21/20			12/21/20	PANGELINAN MARIANNE	TO CP-ZOC
2	CP-ZOC	12/29/20	12/29/20			12/29/20	CORRETTE MOSES	Revise to replacement. Re-cast newel posts and replalce trim beneath bull nose of treads
3	BLDG	1/19/21	1/19/21			1/19/21	HUANG VIVIAN	approved. route to BSM
4	DPW- BSM	1/21/21	1/21/21			1/21/21	CHOY CLINTON	Approved. 1/21/21: No alteration or reconstruction of City Right-of-Way under this permit. Routed to Issued Box. -CC
5	CPB	1/25/21	1/25/21			1/25/21	SHAWL HAREGGEWAIN	INV. 1/25/21HS

This permit has been issued. For information pertaining to this permit, please call 680-680-8478.

Now look at this as per June 2021:

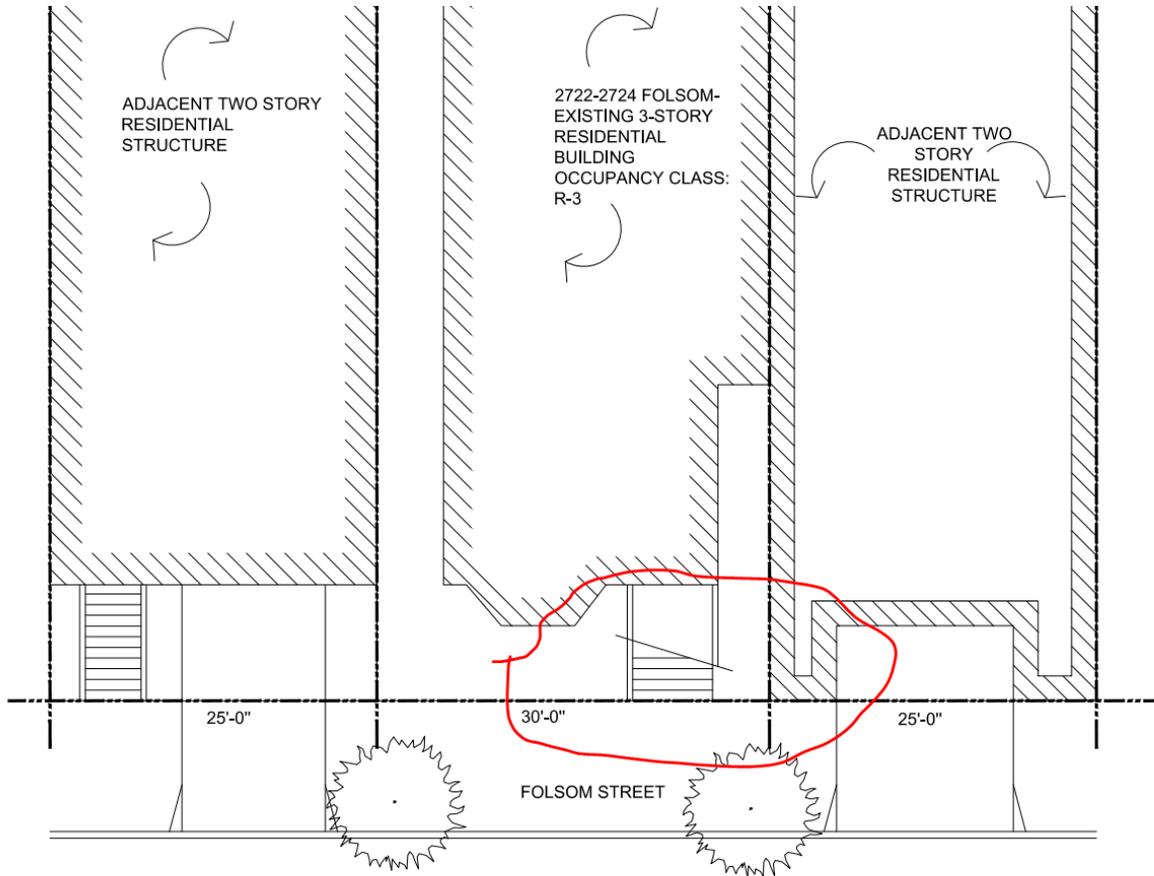

Look at the new raised height of the newel posts! The bottom tread is now at about the height of the traffic cone. That means the treads below will have to be extended horizontally onto the sidewalk. He has no right to do this without permission. This was not as it was previously.

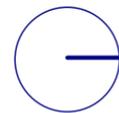

Drawing G1.01:

Subject property does not show encroachment of existing stairs into sidewalk

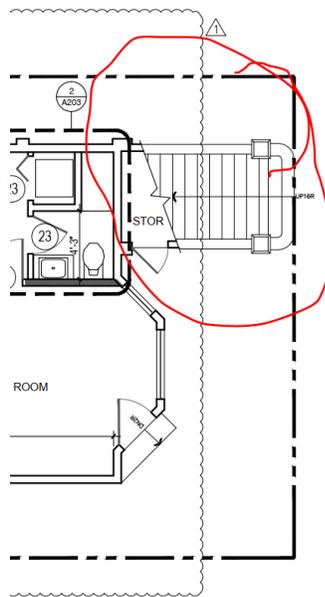

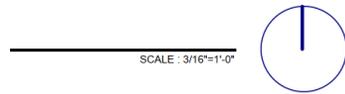

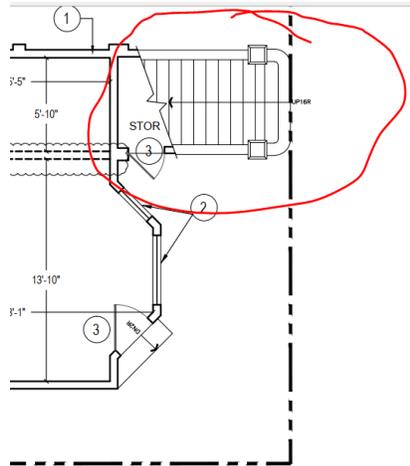

① SITE PLAN
1/8" = 1'-0"

Drawing A2.01

Top image is "Existing" and lower is "Proposed". There is no indication of any work for the front stairs

The Structural Plans have no indication of elevation and they indicate no work for the staircase.

Mr. Turon believes he owns the sidewalk of Folsom Street and may build a tripping hazard there without permission because it suits him is just one example of what kind of arrogance he poses in his continued pattern of abusive behavior of the system that he is able to exploit. There is a school one block away. Planning and DBI are doing their jobs to ensure safety of neighbors and visitors. Please DENY his appeal.

----- END of Document-----
