Partnership Statistics - Commissioner Johnson reported on follow up inquiries regarding the 2015 Partnership shelter statistics information from the April meeting presented by Cynthia Kopec, of the SF/SPCA and Vicky Goldbech, of SF ACC.

Commissioner Johnson requested a report from the SF/SPCA that parsed out data of animals from outside the City and County of San Francisco so that the report is consistent with ACC’s data.

SF/SPCA responded there are database system constraints that don’t allow them to generate that report.

Commissioners will review the Partnership Statistics report between the SF/SPCA and ACC to see if Commissioners can recommend to the Board of Supervisors that the SF/SPCA provide an SF animal only report. This may give a more accurate live release rate for San Francisco animals.

Next steps include sending a request to ACC and SF/SPCA as well as follow up with both organizations to see how changes are made to the Pact.
