Dear Chris and the rest of the Elections Commission,

Just FYI, we at Galois have digested the [RFI scorecard](#) this morning.

We believe that it is erroneous to mark Galois's response to 4.a2.c ("upgrade") and 4.a2.d ("services flexibility") as "no". In our RFI response we promise a system that uses COTS hardware and operating system (bottom of pg. 8, and pg. 9) and uses only open data formats and APIs (pg. 7).

We do not see any way to fulfill those requirements in any other fashion.

We are polishing the written response to the Commission's questions for Wednesday's hearing now. See you Wednesday!

Best,
Joe Kiniry
