About us

Actnet Advanced Technology Corporation has been delivering quality IT products and services to the greater Bay Area for more than 25 years. We strive for excellence and work diligently to provide service that is timely, friendly, reliable, and affordable.

We embrace changes and continuously expand our services to cover new technology products and systems. Helping customers make the most out of their technology investment is simply our passion. We love this industry because it has given us the opportunity to help our clients with their technology challenges and has allowed us to become the trusted technology partner for many organizations and government agencies.

Our Capabilities

Technical Support Services

- Contracted services for long term, short term, or as-needed, with full time or part time resources
- Field support or remote help desk operations
- Hardware, software, or network setup, configuration, and maintenance

Repair and Maintenance Services

- Fast and reliable repairs on demand
- We work with a wide range of device types, brands and models
- We service desktops, servers, laptops, tablets, smart phones, displays, and office electronics
- Highly skilled chip level diagnostic, repair, upgrade, and replacement services

Computer Training Services

- Technical training in disciplines of your desire
- Group training on-site or at a training center
- Self paced online courses on demand

Audio, Visual, and Low Voltage Services

- Conversion and digitization services
- Editing, noise removal, and video captions
- Low voltage system design, installation and configuration
- Voice and data wired and wireless installation, termination, and testing

System and Network Integration

- Solution design customized to each project
- Hardware & software integration for optimized performance and productivity
- Cost by contract or time and materials used

Value Added Reseller

- Sale, service, and configuration of a wide range of IT products, network devices, peripherals, audio visual equipments, security cameras, electronic components, parts, and accessories

Technology Partners

Contracts

- CCSF Tier 3 Contractor for:
- Computer Hardware, Software, and Peripheral Equipment
 - Computer Systems Equipment Maintenance and Repair
 - Computer System Services
 - Computer Training Services

About ApisTech

We build tools that help governments improve services and keep pace with emerging technologies.

Apis Technology, LLC (ApisTech) is a California certified SBE and San Francisco certified Micro LBE. We take immense pride in supporting local government and strive to provide the most value to our clients.

Services

We specialize in the following areas and can support projects large and small.

Salesforce

We are Salesforce OEM & LBE partners and we have implemented more Salesforce solutions for the city of San Francisco than any other vendor, helping deliver over a dozen Salesforce applications for the SFMTA.

Examples of how Salesforce can be used:

- + build community portals to better interact with the public or external stakeholders
- + rapidly transition workflows from Access/Excel to modern cloud-based software
- + easily manage new permit programs/regulations/services
- + automate routine tasks and enable powerful notifications

Integrations

We have helped build and maintain many valuable integrations for the city of San Francisco. We are comfortable working with just about any technology or database out there.

Examples of Integrations that have proven useful to other agencies:

- + integrate with Data SF's public data library to either retrieve or publish public datasets
- + integrate 311 cases with Salesforce to automatically route and track issues related to your department
- + integrate with other agency databases and tools to help streamline or automate communications and data sharing
- + integrate ArcGIS with Salesforce to bring powerful GIS tools inside of business applications

Data Services

Data underlies every important decision made in government today. We can assist in developing this value in many different ways, including data analysis, data processing and even data architecture.

Examples of data projects we have led:

- + processing telemetry data to catch commuter shuttle permit violations
- + measuring the effects of meter maintenance issues on parking revenue
- + analyzing a decade of transit vehicle accidents to determine primary factors
- + finding conflicts across all street-use-permit databases

Project Support

Few things affect the integrity of our local government more than project delivery. We can provide experienced project support personnel who can help navigate and mitigate project risks, ensure on-time delivery, support requirements gathering, provide system/technical analysis, and user-story refinement.

Examples of Project Support we can provide:

- + timely assessments of business and technical challenges
- + project management support/contractor monitoring
- + Quality Assurance management
- + documentation and training

BETA NINETIES COMPUTER INC.

188 SPEAR STREET, STE 110
SAN FRANCISCO, CA 94105
VOICE 415.974.1188 FAX 415.974.1575

“One Stop Solution” is our mission statement. Beta Nineties (Beta 90) Computer Inc. has over thirty one years of experience in the computer/networking industry and it is located in the SF Downtown Financial District and a small retail store on Howard Street and carry a full line of computer parts for customers to purchase. We also have the access to over hundred millions of dollars of inventory through our nationwide suppliers. Beta 90 Computer Inc. is certified by the city Human Rights Commission (HRC) office as a Micro Local Business Enterprise/Minority Business Enterprise and city 14B compliance. Beta 90 Computer Inc. is a leading integrator of computer technology for Public Sector, Home User, Federal Government and Local Government Agencies.

Beta 90 Computer Inc. is fully understand the City’s over 65 departments of varying sizes and needs because we deal with different small business clients all the time and provide year round support for them. Buying a computer is only one time transaction and the after sales support that you will get from a reliable vendor is very valuable. For city’s large department like SFPD, they have their own IT team to take care the problems. But the smaller department will have to wait for city IT team member to solve their problems, sometimes it might take few weeks. Beta 90 knows exactly what most computer users and IT personnel wanted; just one phone call and someone will take care of their computer needs. Through hard work and proven dedication to our clients, we truly know the products. Beta 90 Computer Inc. is ready to provide good computer hardware, software, peripheral equipment and On-Site services to CCSF.

CCSF/Beta 90 Computer Inc. info:
City Supplier ID Number: 24375
HRC Certification Number: HRC060913722

C M Pros

1. C M Pros Contact Information:
 Samir Messiah, PE – President
 1061 Market St., Suite 516
 San Francisco, CA 94103
 Tel: 415-437-0701 | Fax: 415-437-0702
 Email: Sam.messiah@cmprosinc.com

2. C M Pros has been in business for 28 years. C M Pros is a San Francisco-based construction management firm, founded in 1992 to provide construction management and engineering for local government agencies. We are certified as a Local Business Enterprise (LBE) by the San Francisco Contracts Monitor Division and as a Small Business Enterprise (SBE) by the State of California.

In addition to our long-standing construction management practice, C M Pros provides a range of specialized services in information technology, with emphasis on database management and training in the program and project controls, scheduling, and construction management fields. We have highly trained and credentialed specialists in database management, systems integration, and software implementation and training.

In 2009 (11 years ago) C M Pros' information technology services grew organically as an extension of our Program Controls services. The word *program* in the context of construction management usually refers to a group of many individual projects which are related—by function, policy or funding—but which are planned, designed, bid, built and managed separately. Program Management is also a vital element in fields such as manufacturing, transportation, operation of complex utility networks, and supply chain management. Because programs typically involve many projects and participants using different approaches to capture and report information, a system is needed to make sure that information is available in a usable form. Obstacles which need solutions include the different programming languages in use across the organization, incompatibilities of software programs, the form in which the data is organized, the schedules of when data is updated, and the ability to retrieve information easily when required. C M Pros can provide solutions to these and many other challenges in the data integration, migration, implementation and configuration fields.

C M Pros provides other technology-based services including:

- Record/ Information Management Services
- Software Training
- Computer Aided Design (CAD)
- CPM Scheduling

C M Pros was a Prime Consultant under a Contract issued by the San Francisco Office of Contract Administration for computer training, and a Joint Venture Partner or Subconsultant on several additional contracts for a range of information technology services city-wide.

Davis R. Schwartz
Senior Principal

Please let me take this opportunity to introduce myself to you. I am a Micro LBE newly certified to provide (a) computer system services and (b) computer training services in order to assist CCSF departments in maintaining, developing, and improving information systems and processes. In addition, the Controller's Office has prequalified a Capital Partnerships team to provide ERP implementation & support services in 5 categories: (1) functional / technical support of existing systems, (2) implementation of new systems & functionalities, (3) project management, (4) change management, and (5) auditing services.

Prospective Scope of Computer System / Training Services

I have spent the past 6-½ years as Enterprise Resource Planning (ERP) Project Managers for Merced County, CA and the past 1-½ years as ERP Project Manager for Kings County, CA. As a result, I have extensive expertise and experience in:

- Project management: project management planning, Microsoft Project scheduling, project budgeting / tracking, issue / risk analysis and tracking, management reporting, steering committee / project team meeting facilitation
- Business process mapping: both "as is" and "to be" processes
- Needs analysis: analysis / documentation of information system needs
- Software system implementation: technical assistance in third-party software implementation
- Custom systems: technical assistance in custom system design/development/implementation
- Testing: technical assistance in acceptance / parallel / integration testing
- Post-implementation support: technical assistance in resolving system issues for after go-live
- Business process improvement: technical assistance in identifying / implementing business process improvements associated with newly implemented information systems.

Background and Experience

During the past 43 years, I have provided management consulting services to 11 different San Francisco departments and agencies. During that time, I have also served as a management consultant to 7 City of Los Angeles departments, 5 County of Los Angeles departments, and 8 State of California departments

FEATURED WORK

SF Mayor's Office of Housing and Community Development housing.sfgov.org

The DAHLIA San Francisco Housing Portal democratizes and drastically improves how San Franciscans search and apply for affordable housing: it is a one stop shop. Our Agile approach allowed us to go from design, to development, to initial product release in 90 business days, iteratively building and testing each feature every 2 weeks for 2 years. 80,000+ citizens have applied through the site since online applications were made available in 2016.

SF Unified School District sfusd.edu

SFUSD had 100+ websites, grouped into 4 target audiences: parents, faculty, students, and staff. Starting with a design sprint, Exygy created a cohesive digital experience to get relevant and updated information in a seamless and timely manner. Together we co-designed solutions to common pain points, tested prototypes with SFUSD families, and gathered feedback. Designs were implemented into a best in class Drupal-powered CMS. online applications were made available in 2016.

Exygy partners with social impact organizations to design and build technology that improves lives.

Ms. Department Director
San Francisco City Department
San Francisco, CA 94119

June 16, 2020
Contract No. 1

Dear Department Director:

We would very much like to assist you with your technology needs. The Thier Group LLC is an approved vendor for the San Francisco Technology Marketplace 2.0, Set-Aside Program for Micro LBE Vendors.

The Thier Group is pleased to provide technology solutions for all of our clients needs. We come in and assess your specific needs and locate or develop a customized solution. Our expertise in computer hardware, software, computer system services, database development and analyses, as well as computer training will only help you accomplish your objective with the fastest and best technological solution possible. We have provided technology services and solutions to numerous government, industry and professional clients.

The Thier Group LLC brings twenty-five years of experience working with the City and County of San Francisco and in assisting government clients. We have provided key services to the San Francisco Public Utilities Commission, the San Francisco International Airport, the California Department of Transportation, and many more City and other government entities.

We have also regularly bid on projects in the City and County of San Francisco.

We would be very pleased to assist your Department in the following areas:

- Assisting with Technology Solutions, including computer systems services
- Assisting with Computer/software/database training
- Assisting with Database Analyses, Creation and Maintenance
- Other Professional Services

Our seasoned professionals stand ready to assist your Department with customized technology solutions.

Please feel free to contact me anytime at (415) 407-4843 for all your technology needs.

Very Truly Yours,

Holli P. Thier, J.D., President

3749 Buchanan Street, Suite #475266 San Francisco, CA 94147

SERVICES

Change Management & Readiness

TRC has provided Change Management for large-scale, corporate-wide deployments for clients at a significantly lower cost than well-known consulting firms. We have a team of Prosci® certified Change Practitioners with proven expertise to assist clients deploy new platforms effectively with minimal disruption to existing workflows, facilitating user adoption and Return on Investment (ROI). Change activities include Strategy, Impact & Readiness Assessments, Stakeholder Analysis, Change Network, Communications, Training Post Go-Live Support Planning and Effectiveness Metrics/KPIs.

Project/Program Management & Coordination

Our team has a record of accomplishment for providing project support for fast-paced, mission critical projects using both Waterfall and Agile/SCRUM methodologies.

Training Planning & Development Services

Two Rivers, Corp. plans and develops customized training materials and courseware to meet the specific requirements of our clients. We develop interactive, e-Learning training on various platforms such as Oracle User Productivity Kit (UPK), and Adobe Captivate.

Communications Planning & Execution

We ensure our client's success, in major change initiatives, by fully understanding the impacts to all stakeholder groups and developing detailed communication plans to consistently communicate key project messaging. All communications are developed and executed in partnership with the client leadership team.

Speed Up Your Digital Transformation with Artificial Intelligence and Automation

About Us

Elyon Strategies is a management consulting firm in California specializing in enterprise design and business transformation. Our team of experts has pioneered the use of artificial intelligence, automation and machine learning to process information faster and create more accurate, precise models and applications for government agencies.

We have designed some of the largest IT initiatives in the State of California. That includes a 30-year modernization plan for the Franchise Tax Board, Medi-Cal digitization for the Department of Health Care Services, and development of a comprehensive cloud migration strategy for the California Department of Technology.

What We Do

Cloud Services Provider

We're an approved cloud services provider. We facilitate the co-creation of digital strategy and execution and end-to-end digital transformation solutions. We accelerate cloud adoption and migration as well as cybersecurity projects, assessments and audits.

Healthcare Technology

We're a forward-thinking IT solutions provider for healthcare agencies large and small, including HHS and DPH. Our IT integration and project delivery expertise optimizes Medicare/Medicaid, Epic Staffing — and more!

Public Works/Utilities

We help public works, transportation, and utilities agencies modernize, manage, and maintain their IT systems via managed service offerings and hybrid delivery models. Our experience includes Geographic Information Systems (GIS), asset-management (Maximo), Customer Care and Billing and SCADA Software.

Staff Augmentation Services

We cater to a variety of diverse technical requirements across all areas of technology migration, project delivery and maintenance and support services. Our certified, locally available talent pool is ready to serve CCSF.

Cloud + Data Center Transformation

You're providing critical services — we can support you.

We're living in a changed world today. People's lives have been upended in ways we never could have imagined.

For your agency, institution, or organization, the changes have had added impact. Not only do you need to support a larger remote workforce and take measures to protect the health and well-being of those you employ, you're also on the front lines, defining new standards that enable citizens and students to thrive despite uncertainties.

Insight Cloud + Data Center Transformation (CDCT) provides strategic guidance and rapid solution designs and implementations to support public sector groups at this critical time. This includes specific technical and security enhancements to network infrastructure, as well as managed services to help you better balance a growing list of priorities.

The outcomes we can help you achieve:

Enhanced security and compliance

Governance and compliance

Better collaboration capabilities regardless of geography

Centralized visibility and control

Risk management and mitigation

Improved scalability with cloud solutions

Operational efficiency with automation

Framework and standard creation

Secure connectivity to critical business services from anywhere

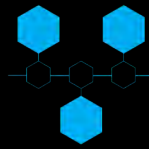

Trusted & Recognized Strategic Service Provider

InterVision is a leading strategic service provider (SSP) focused on helping organizations transform their datacenter strategy, improve risk management, and gain a competitive advantage. We solve crucial IT challenges by delivering the right technology, deployed on the right premises, and managed through the right service model to fit a client's unique challenges. Our longstanding experience in the datacenter coupled with excellence in cloud and data science means your long-term strategic vision can become your short-term reality.

RIGHT TECHNOLOGY

Self-Service

A Legacy of Evolution to Power your Evolution

InterVision's history is a story of evolution and technical innovation. In 1993, we opened our doors providing CAD solutions and consulting services then moved into datacenter and corporate IT networking, computing and storage. In recent years, we expanded services and solutions through strategic alignment and six acquisitions to develop a broad and robust portfolio of managed and cloud-based services. Today, we take a consultative approach to focus on your strategic vision first, and then map comprehensive solutions, services and support to every IT area to achieve your business outcomes.

InterVision's Portfolio

- **Datacenter Transformation** – Cloud Services, Cloud Migration, Infrastructure as a Service, Managed Server & Storage Services, Automation, DevOps, Network Infrastructure, SD-WAN, Storage, Servers
- **Hardened Resiliency** – Disaster Recovery as a Service, Backup as a Service, Managed Security Services, Datacenter Security, Application Security, Identity Access Management, SIEM
- **Modernized Communications** – Hosted & Managed Collaboration, Carrier Services, Contact Center, Digital Workplaces
- **Data Intelligence** – Machine Learning, Artificial Intelligence, Predictive Analytics
- **Professional Services/Consulting** – Network Architecture, Engineering, Staff Augmentation, Compliance Support

The breadth of our services portfolio is unmatched by even the largest IT integrators, backed with our team of expertly trained engineers with the highest-level technical certifications from leading IT vendors and service providers. Certified as an AWS Premier Consulting Partner and a Microsoft Gold Partner, we boast a deep bench of sales and engineering staff who have led our clients through some of the largest cloud projects in the nation. Our project managers follow a well-defined methodology based on thousands of IT infrastructure deployments to ensure a successful outcome. With SOC 2 Type II compliant networks and security operations centers, our experts provide 24x7x365 assistance to you.

Presidio is the premier provider of digital transformation solutions built on secure digital infrastructure deployed in a multi-cloud world.

ABOUT PRESIDIO

Presidio is a leading North American IT solutions provider focused on Digital Infrastructure, Cloud and Security solutions to create agile, secure infrastructure platforms for its customers. We deliver this technology expertise through a full life cycle model of professional, managed, and support services including strategy, consulting, implementation and design. By taking the time to deeply understand how our clients define success, we help them harness technology advances, simplify IT complexity and optimize their environments today while enabling future applications, user experiences, and revenue models. We serve approximately 8,000 middle-market, large, and government organizations across a diverse range of industries. Approximately 2,900 Presidio professionals, including more than 1,600 technical engineers, are based in 60+ offices across the United States in a unique, local delivery model combined with the national scale of a \$2.8 billion dollar industry leader. We are passionate about driving results for our clients and delivering the highest quality of service in the industry.

For more information visit: [presidio.com](https://www.presidio.com)

DIGITAL INFRASTRUCTURE & CLOUD SOLUTIONS

Digital infrastructure makes traditional IT more efficient and provides a foundation for future innovation.

Our Digital Infrastructure solutions help make existing IT infrastructure more efficient, while equipping our clients for a cloud-flexible, mobile-ready, highly secured, insight-driven future. Given the millions of potential configurations across these technologies, our clients rely on our expertise to simplify a highly complex IT landscape, helping to identify and deploy the solutions most appropriate for their business needs.

We offer professional, managed and support services including strategy, consulting, design, and implementation for:

- **Cyber Security**
- **Managed Security**
- **Networking (Aruba, Cisco, Juniper, etc)**
- **Collaboration**
- **Contact Center**
- **Application and Desktop Virtualization**
- **Enterprise Mobility**
- **Data Analytics**
- **Data Center Modernization**
- **Cloud Solutions - Hybrid/Multi Cloud (AWS, Azure, Google Cloud)**

who we are

Slalom is a modern consulting firm focused on strategy, technology, and business transformation.

We live and work in this community. As community members, we have a personal stake in the success of our government agencies.

why we're different

Human-Centricity

Our approach offers problem solvers of all kinds a chance to deeply understand the people they're looking to serve, to dream up scores of ideas, and to create innovative new solutions rooted in people's actual needs. We work with government agencies to design solutions to complex problems by focusing on the human impact.

Community Engagement

The public you serve are your customers, yet many government agencies lack the customer insights and focus that drive better performance. Slalom seeks to identify and address the root cause of critical challenges by understanding the experience of your customers – and that of your staff – as they engage with your organization.

our partners

We partner with over 200 of the world's leading technology solution providers.

what we do

Business strategy

Define and implement a holistic cloud strategy and roadmap that maximizes value from the cloud.

Advanced data & analytics

Illuminate insights and intelligence through modern data architectures, AI, and Machine Learning.

Cloud migration

Build modern capabilities and the resilience needed to stay ahead of change.

Engineering

Build new, cloud-native, integrated digital and data solutions.

Operational excellence

Break down complexities, define measurable milestones, and move quickly to execute, learn, and iterate.

Our expertise ensures that your data center is fully optimized to meet the requirements of your business. We work with you to make it a highly-provisioned and operationally efficient business asset: architectural excellence delivered alongside best-in-breed management solutions and an operational and service model tailored to your requirements.

Defining a strategy

To define a strong and successful data center strategy you need access to specialists, and to make sure that needs and requirements are captured and communicated to the right people at the right time. Proper data center development requires a diverse set of skills and a holistic approach.

The SoftNet Solutions consultative approach has been honed over years of practice to deliver just that: we get the whole range of skills working together—from IT consulting to engineering—to ensure that your data center meets all standards and exceeds your expectations.

A source of excellence

SoftNet Solutions has created a center of excellence for unified data centers. Our team members have accreditations from industry-leading vendors, and have expertise in all major virtualization and data center platforms, as well as storage, security, network and management provisioning solutions.

We work across every technology and operational layer in the data center. Whether you want to consolidate or virtualize your computing, storage or network environment, or transform management through aggressive operational automation, we can provide you with insight and practical solutions.

Selecting products

From mission-critical servers and complex wired and wireless networks, to high-end storage and operating systems and much more, we can help you choose the best products for your solution.

Because we are vendor- and platform-agnostic, we can focus on what is right for your solution, rather than for us or the vendor.

Servers and Storage

We can provide you with a certified, experienced, and proactive team of server and storage specialists who guide your project from start to finish, and help you optimize your computing environment by improving performance, utilization, availability, security and management.

To help you achieve those objectives we:

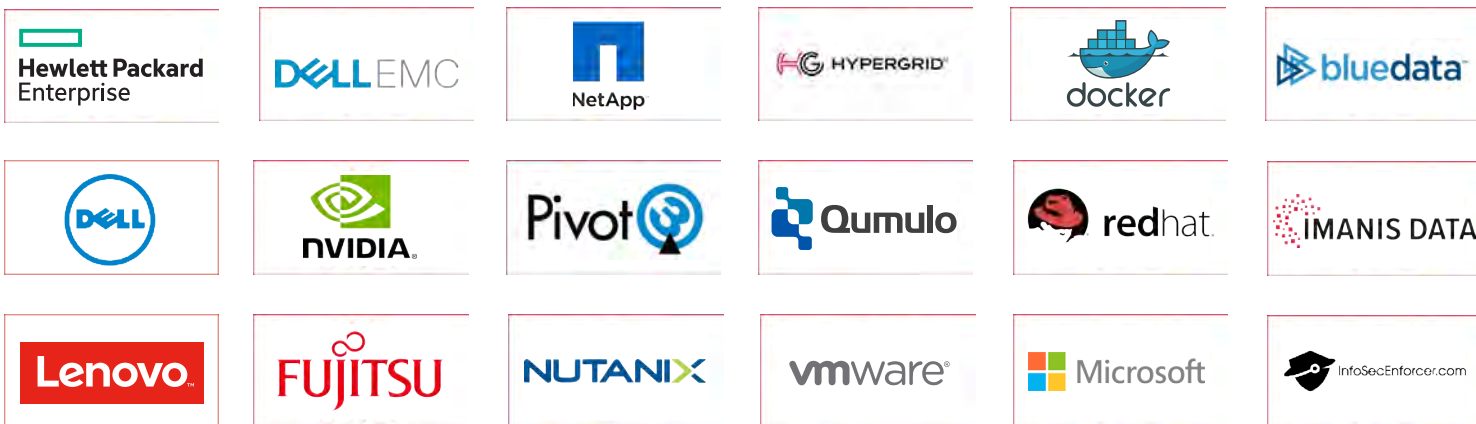

- Document your current server or storage situation
- Establish a server or storage management strategy and prioritization plans
- Assign appropriate availability for each data set
- Consider whether to consolidate or to use a storage area network (SAN)
- Centralize your server or storage management
- Create, modify, or update your organization's backup and disaster-recovery strategy.
- Business Continuity and Disaster Recovery

Business continuity and disaster recovery are critical, and our continuity planning is second-to-none. We provide a comprehensive range of services to ensure the continued well-being of your organization, giving you the peace of mind to focus on your business.

And if your infrastructure or IT environment changes as a result of a change of focus or strategy elsewhere in the business, we can help you transition your continuity and disaster recovery plans quickly and easily.

Our suite of services includes:

- Site-to-site replication
- Host-based replication
- Storage encryption
- Network convergence
- Storage-based replication
- De-duplication
- Storage virtualization

Stellar Services, Inc. Company Profile

Stellar Services is an information solution consulting firm with over 25 years of experience in delivering outstanding professional services to our clients providing a comprehensive range of innovative and effective IT consulting and professional services to government agencies at the federal, state, and local levels.

Contact: Chris Donohue, VP, Stellar Services
cdonohue@stellarservices.com
 (505) 660-9889: <http://stellarservices.com/>

Our five primary solution offerings include advanced knowledge with the following:

- Project Management Information Systems (PMIS)
- Enterprise Content Management Systems (ECM)
- Enterprise Asset Management Systems (EAM)
- Geographic Information Systems (GIS)
- Software Development, System Integrations, Data Migrations/Conversions

Within the above offerings, detail functions include:

Project Management Information Systems

- Project management and construction management system implementations
- Business process reengineering
- Customer coaching / Guidance
- Software and PM business process training
- Systems: Kahua, Unifier, e-Builder, EcoSys, Prolog, SharePoint
- Contract Management, RFIs, material submittal, document management

Enterprise Content Management

- Document and Records Management, 311 Systems, Public Request systems
- System implementation, configuration, training, coaching, testing
- Business process workflow automation
- Scanning/OCR/vendor invoice management
- Systems: OpenText, SharePoint, NeoLedge

Enterprise Asset Management Systems

- System implementation, configuration, integration, documentation, testing, training
- Systems: Infor EAM, Maximo, Tririga
- Special focus on transportation and vertical office space

GIS / Software Development

- GIS Planning, mapping, system implementations of ESRI
- Custom software development
- Systems integration / data migration
- Business Intelligence/Reporting/Dashboards
- Post Go Live system administration

Enabling Digital Transformation

WWT demonstrates, develops, designs, builds and deploys integrated architectural solutions and transformational digital experiences for our customers around the globe. We do this through a collaborative ecosystem with thousands of IT engineers, hundreds of application developers and unmatched labs for testing and deploying technology at scale.

Our [Advanced Technology Center \(ATC\)](#), a physical campus accessible virtually anywhere in the world through wwt.com, is the perfect environment to test enterprise technology through our suite of collaborative technology labs, to evaluate reference architectures, and to analyze and compare competing products, powered by an ecosystem of WWT engineers and OEM partners.

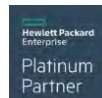

Delivering Strategy and Execution

Our services portfolio — [Consulting](#), [Application Development](#), [ATC Lab Services](#), [Infrastructure Development](#), [Supply Chain and Integration](#), and [Strategic Staffing](#) — supports organizations from idea to outcome on every step of their digital transformation journeys.

WWT’s core technology areas — [Automation and Orchestration](#), [Carrier Networking](#), [Data Center](#), [Digital Strategy](#), [Digital Workplace](#), [Multicloud Architecture](#), [Networking](#), [Security Transformation](#) — feature teams of experienced, industry-certified technology professionals who help organizations implement the right technology solutions to achieve their ultimate business goals.

Partnerships

AREAS OF SPECIAL RECOGNITION:

Great Place to Work, Diversity, Women, Millennials, Technology, Giving Back, Gen X, Camaraderie, College Graduates, Parents

Xtech, the joint venture of 21Tech and Eaton and Associates, was founded in 2000 with a focus of delivering the highest level of quality and expertise to the City and County of San Francisco (CCSF). Our parent companies were founded in 1996 and 1989, respectively. Both firms were founded in San Francisco and remain headquartered in the Bay Area. Our experience in enterprise solution deployments, includes San Francisco's Business Tax Application, Permit Tracking System, and multiple Enterprise Asset Management implementations, with reporting solutions on all of the above. Additionally, we have designed and deployed numerous data centers, a number of call centers, including San Francisco's 311 Call Center, and data warehouses for BI/Reporting.

We partner with the departments and agencies within the City and County of San Francisco to provide not only the industry's best practices, but to take that core framework and adjust it so that it will work for a multi-organizational customer like the City. User adoption is key. We have no interest in selling shelf ware, we provide working, practical solutions that improve the City's employees the best means of providing key services to its constituents and businesses

Xtech is exceptionally suited for working with the City, as we understand the entire procurement process: from qualifying ourselves, to qualifying our sub-contractors, including our LBEs. The Xtech parent companies were certified LBEs before we graduated from the program. Now we reach back to the local business community and bring new companies into the program. We understand City contracting, which is very complex and requires understanding of historical decision making to apply to the ever changing world of technology. We have negotiated many agreements with the City, including the enterprise agreements with Infor, Thomson Reuters, and DocuSign, to name a few. Xtech is your one-stop shop for the City and County of San Francisco's technology needs.
