

I am the future

I am the future

I am what will drive the next generation

I am a child of this nation

I will fight for what is right

In a time where the future is not bright

Oceans rising

Forests burning

How is our world still turning

Nations fighting

Coups rising

Is this country demoralizing

Police brutality

Is not normality

Yet people of my nationality believe in this immorality

Yet I am still learning

How to multiply x by y

How to read and write and be polite

The injustices between the black and the white

And that only I have the power to make it right

I am the future
