The Department commits to a safe, healthy, and vibrant community. Our spirit and work is guided by a *guardian mindset philosophy and we recognize that our role as protectors is rooted in empathy, understanding, and mutual respect. All members of the Department shall embody the following values in all their work, which encompasses the tenets of procedural justice consisting of: voice, neutrality, respectful treatment, trustworthiness, and 21st Century Policing.

**Guardian- defender, protector, or keeper- one who advocates for another. Community members are more willing to cooperate with officers they already know and trust. If Officers view themselves as guardians and have built relationships in the community, they will naturally be more respectful and considerate, promoting safety with respect.*

Partnership

- We proactively nurture relationships with and empower all San Francisco community members to take an active role in public safety and find solutions to local issues.

Honesty and Transparency

- We develop and maintain honest and transparent communication with the communities we serve.

Responsibility and Accountability

We have the courage to take responsibility for our actions and be held accountable by ourselves and others.

1.08.02 DEFINITIONS

Community Policing is a mindset through which Officers build collaborative, transparent, trusting relationships with the communities they serve through partnerships and problem solving. It is built upon the philosophy of embodying a guardian mindset, which officers feel like and are seen as a part of the community, rather than separate from it.

Community Engagement reflects a community policing mindset through actions in which Department members seek to build trust and relationships with community members, such as through positive one-on-one interactions while on patrol, Department sponsored programs, or participation in community events and discussions. Community engagement upholds the language and spirit of the Department's community policing Vision and Values statement.

Problem Oriented Policing and Problem Solving is a community policing strategy that seeks to identify and address the underlying conditions that contribute to public safety problems in our communities. Problem Solving involves a systematic "long view" approach to solving and or significantly reducing community problems. Typically, a problem is defined by two or more related and ongoing crimes, community concerns, or disorder that the police are expected to handle. Department members are encouraged to utilize formalized problem solving methods in partnership with the community in an effort to identify and solve problems. Department Manual 2 (Community Policing) provides the structure and process for the application of Problem Solving for community problems.
