San Francisco Food, Nutrition, and Agriculture Directory, 3rd Edition
The “San Francisco Food, Nutrition and Agriculture Directory”, 3rd edition (2005) (FNAD) provides a listing of useful resources and services available to San Francisco residents. We have made an effort to include resources for low income, mostly Food Stamp eligible residents. The purpose of this directory is to assist health care and community service providers, service agencies and educational institutions, help their clients to:

- identify and use locally available food and nutrition resources
- learn about and advocate for change in their local food system

In addition, we want to provide resources for agencies to:

- purchase lower cost food
- receive food from the San Francisco Food Bank
- take food handling courses

The information listed in this directory was derived in part from the San Francisco Food and Nutrition Resource Directory 2nd edition (1997) and the San Francisco Food Systems Guidebook 1st edition (2003), both of which were used as a point of departure in gathering resources. All resources contacted were asked to refer us to any additional resources they were aware of.

No agency or resource listed in the San Francisco Food, Nutrition and Agriculture Directory pays for its listing. All information has been provided by the individual agency or resource and its listing here does not imply endorsement by the City and County of San Francisco Department of Public Health, the Department of Aging and Adult Services, San Francisco Food Systems, the California Department of Health Services, Cancer Prevention and Nutrition Section, or any of its directors or sponsors. An omission of any resource is just that, an omission. It does not imply any judgment of any organization or a resource’s merit.

Corrections should be sent to:

INTRODUCTION

Who is the San Francisco Food, Nutrition and Agriculture Directory for?

This Food, Nutrition and Agriculture Directory is intended for use by providers and organizations, rather than potential clients. By including information on eligibility, language capabilities and whether there is a fee, we hope to assist providers in guiding low income Food Stamp eligible clients to the most accurate and appropriate resources. To create a directory with the greatest longevity, we have in some cases omitted specific service sites and/or hours of operation. By calling the number listed or checking the website when available, the provider or client will be able to get the most current information available.

What’s included in the San Francisco Food, Nutrition and Agriculture Directory?

The Food, Nutrition and Agriculture Directory is divided into six major sections: Food Resources (Government Food Assistance Programs, Free Meals and Groceries, Meals and Food for Special Populations, Low Cost Food Resources, and Farmers Markets); Nutrition Counseling resources; Weight Management resources; Nutrition Information and Education resources; Food Safety resources and Food Systems, Advocacy and Agriculture resources.

How to use the San Francisco Food, Nutrition and Agriculture Directory

We suggest users review the table of contents of the Food, Nutrition and Agriculture Directory (FNAD) ahead of time so that they are familiar with the range of organizations listed. There is a table of contents for the whole FNAD in the beginning. Organizations are listed alphabetically within each of the major sections and within each of the various sub-headings in the Food Resources and Food Systems, Advocacy and Agriculture sections. In addition, at the end of the directory there’s an alphabetical index listing all the organizations in the FNAD.
ACKNOWLEDGMENTS

Co-Editors San Francisco FNAD 3rd edition, Summer 2005 (alphabetical)

Laura Brainin-Rodriguez, MS, MPH, RD
Coordinator, Feeling Good Project
Nutrition Services, Maternal Child Adolescent Health Section
San Francisco Department of Public Health
Produced the 2nd edition of the San Francisco Food and Nutrition Directory; provided oversight for the review, production and formatting of the Nutrition Counseling, Weight Management and Nutrition Information and Education sections; compiled and edited the final draft of the FNAD 3rd Edition; oversaw the development of the CD-ROM version of the FNAD; oversaw printing and the production of the CD-ROM; fundraised for the printing of the FNAD 3rd edition; located the Eating Disorders resources and participated in both the FNAD work group and advisory committee.

Linda Lau, RD, MPH
Nutritionist, Office on the Aging
San Francisco Department of Aging and Adult Services
Brought together the people who developed the Food and Nutrition Directory and the San Francisco Food Systems Guidebook, leading to the collaboration now known as the Food, Nutrition and Agriculture Directory for the City and County of San Francisco (FNAD); provided oversight for the review, production, editing and formatting of the Food Resources section; oversaw the development of the first draft of the interactive electronic version of the FNAD; fundraised for the printing of the FNAD 3rd edition and participated in both the FNAD work group and advisory committee.

Leah Rimkus, MPH
Program Manager, San Francisco Food Systems (a project of The San Francisco Foundation Community Initiative Funds)
Developed the San Francisco Food Systems Guidebook 1st edition; provided oversight for the review, production, editing and formatting of the Food Safety and Food Systems, Advocacy and Agriculture sections; provided administrative support for the development and production of the FNAD; coordinated communication with the Advisory Committee; fundraised for the printing of the FNAD 3rd edition and participated in both the FNAD work group and advisory committee.

Special Thanks to the following individuals whose work made this directory possible: (alphabetical)

Julie Engberg, RD – Nutrition Education Coordinator, SF WIC Program - Researched and provided the Weight Management Information and Vegetarian Diet Information entries and resource lists.

Angelica Ibarra – Health Worker, Feeling Good Project - Contacted listings in the Nutrition Counseling and Nutrition Information and Education sections and formatted these for inclusion in the FNAD; researched listings on the internet to update; tracked agencies and organizations via phone, email and fax for updates; and edited and formatted entries and Table of Contents to reflect changes.

Paula Jones - Director, San Francisco Food Systems (a project of The San Francisco Foundation Community Initiative Funds) - Compiled and reviewed the information in the Food Systems, Advocacy and Agriculture section; fundraised for the printing of the FNAD 3rd edition.
Janice Lee – Assistant Health Educator, Feeling Good Project - Contacted listings in the Nutrition Counseling, Weight Management sections and formatted these for inclusion in the FNAD; researched listings on the internet to update; tracked agencies and organizations via phone, email and fax for updates; edited and formatted entries and Table of Contents to reflect changes; cross-checked websites from the Eating Disorders Resources section to ensure accuracy; assisted with the editing of the final draft; created and completed the final draft of the interactive electronic version of the FNAD; compiled the index; designed the cover and spine; coordinated printing and the production of the CD-ROM.

Suzanne Malone RD – Nutritionist, Feeling Good Project - Field tested every listing in the FNAD, including contact information, service descriptions, and other fields; verified the format of the FNAD 3rd edition final draft; and compiled the Nutrition Information and Education Internet Resources.

Larry Pong, REHS - Principal Inspector & Manager of Training, Occupational and Environmental Health Section, SF Department of Public Health – Compiled and reviewed the information in the Food Safety section.

Food, Nutrition and Agriculture Directory (FNAD) Advisory Group (alphabetical)
The following individuals provided input on format and content of the FNAD, field-tested and reviewed the first and final drafts and provided valuable input and support through the process of developing this directory.

Betty Creary - Information and Referral Associate, HELPLINK United Way Community Information Center Special thanks for guidance on what it takes to produce accurate community databases, nomenclature and willingness to share skills and experience in the area of Information and Referral services.

Cheryl Magid, RD – Health and Nutrition Manager, Children’s Council of San Francisco

Aida McIntyre - Eligibility Worker Supervisor, San Francisco Department of Human Services, Food Stamp Program

Rachel Thieme - Program Coordinator, San Francisco Food Bank

Lisa Yamashiro, RD - Program Representative, UC Cooperative Extension, San Francisco-San Mateo, Nutrition Assistant Program Coordinator, City College of San Francisco Nutrition Assistant Program, Consumer Education Department

We would also like to thank all the organizations and individuals who gave of their time to provide and field test the information found in this directory. The administration of this project and duplication of this directory were generously funded by:

- The U.S. Department of Agriculture’s Food Stamp Program, an equal opportunity provider and employer, through the California Nutrition Network (CNN) for Healthy, Active Families. Staff time and funding for duplication provided by the CNN-funded Feeling Good Project and San Francisco Food Systems. Funding for duplication provided by the CNN-funded SFUSD Nutrition Education Project.

- The San Francisco Human Services Agency, Department of Human Services, and Department of Aging and Adult Services

The Food Stamp Program provides nutrition assistance for people with low income. It can help you buy nutritious food for a better diet. To find out more contact the San Francisco Food Stamp Program (415) 558-4186. For information on the California Food Stamp Program, call (800) 952-5253.

**Index – alphabetical listing of all entries**

| I.1-I.9
The resources listed in this section provide information to help individuals or families with an immediate need for food or a need for supplemental food from various programs. The information is also subdivided to address special populations such as seniors, children, pregnant women, etc. The section “Low Cost Food Sources” includes resources to help individuals, families, or meal service agencies find low cost shopping around the city. Farmers Markets are listed since they are an excellent way to increase the community’s access to low-cost fresh produce.

Food Stamp Outreach Program
Phone: (415) 558-4186
Phone: (415) 558-1000
www.sfgov.org/site/dhs/

Services Description
• Food Stamp Benefits Program provides assistance to low-income households, or individuals in the form of an Electronic Benefit Transfer (EBT) Card. The EBT plastic debit card is used to make purchases from stores that accept Food Stamp Benefits. The stores have machines called POS (Point Of Sales) machines, through which the customers swipe their EBT debit cards. The amount of the purchase will be automatically deducted from the Food Stamp EBT account.

• Food Stamp Benefits Program also offers a Restaurant Meals Program for the Elderly, Disabled, and Homeless. Participants of the Restaurant Meals Program for the Elderly, Disabled, and Homeless will receive a Restaurant Meals ID card along with their regular EBT card. In order to buy prepared (cooked) meals with food stamp benefits from authorized restaurants in San Francisco participants will need to present the EBT card along with the Restaurant Meals ID card.

Eligibility Criteria
Applicant must:
• Meet income and resource guidelines - gross income is evaluated based on household size and allowable deductions. Resources limit is $2000; $3000 if age 60 or over.

Continued on next page
Food Stamps Program, cont.

- Applicants may own the home in which they live
- Live in San Francisco
- Not be an SSI recipient
- Be a citizen or legal permanent resident (Children of undocumented residents or SSI recipients may be eligible)

Enrollment Procedures
- Apply in person at the following locations:

Main Office: 1235 Mission Street
Families: 3120 Mission Street or 170 Otis Street
Aged/Disabled: 1440 Harrison Street

When applying bring:
- photograph identification
- birth certificates for all applicants
- proof of legal residence (green card)
- school verification for all children
- rent and utility receipts
- proof of income including wage stubs
- bank statements
- unemployment, disability, and medical expenses.
- Parents and their children 22 years of age or younger who live together must apply together.
- If unable to apply in person, an authorized representative who knows the client’s circumstances may apply and be interviewed on behalf of the applicant.
- If the applicant is unable to designate an authorized representative, is disabled or has work/childcare schedules that make it difficult to apply in person, call 558-4186 to apply by mail or for a special intake appointment.

Languages
Outreach phone line has messages in English, Spanish, Cantonese, Russian, Tagalog, and Vietnamese
Services available in English, Chinese, Spanish, Russian and Vietnamese
Translators available for other languages, as needed
Written materials in English, Chinese, Spanish, Russian and Vietnamese
National School Breakfast and Lunch Program

San Francisco Unified School District, Student Nutrition Services
841 Ellis Street
San Francisco, CA 94109
Phone: (415) 749-3604
www.sfusd.edu

Services Description
• The National School Breakfast and Lunch Programs and After School Snack Program help provide nutritious meals to school children each school day; these meals are aimed at providing an important contribution to good nutrition and to educate the children on proper dietary practices.

• Students with food allergies need to bring a letter from their physician specifying dietary restrictions. The National School Breakfast and Lunch Program and After School Snack Program will then meet their diet requirements.

Eligibility Criteria
Depending on household income and family size, breakfasts and lunches are provided free, at a reduced price or for the prices indicated under fees.

Enrollment Procedures
Application and income guidelines are mailed home, are available at the school sites, and available on the following website (as of March 2005): www.sfusdfood.org

Languages Available
Applications are available in English, Spanish, and Chinese

Continued on next page
National School Breakfast and Lunch Program, cont.

Fees

Any student may purchase a school breakfast and/or lunch. Prices (as of August 2005):

- Breakfast $1.00

Women, Infants, and Children (WIC)
Supplemental Nutrition Program

Administrative Office
30 Van Ness Avenue, Suite 220
San Francisco, CA  94102

Phone: (415) 575-5788
www.dph.sf.ca.us/PHP/wic_program.htm

Services Description
This is a federal nutrition program for pregnant, breastfeeding or postpartum women and for children under 5 years of age. WIC provides:

Nutrition Education
- Individual dietary counseling of high-risk clients by nutritionist/registered dietitian
- Group/individual discussions on various nutrition topics with emphasis on behavior modification techniques

Supplemental Foods
- The WIC program issues vouchers every month redeemable at local retail food outlets. WIC foods provide Vitamins A, C and D, and iron, protein, and calcium.

Breastfeeding Support
- Manual breast pumps are given to breastfeeding women
- The WIC Program loans electric breast pumps to women meeting qualifying criteria
- Certified Lactation Educators are available to assist clients with lactation management and breastfeeding related issues
- Breastfeeding video loan program (English or Spanish)
- Breastfeeding classes for prenatal clients

Continued on next page
Women, Infants, and Children (WIC) Supplemental Food Program, cont.

Referrals to Health Care and Social Services
• WIC Program staff provides appropriate information and referrals for health care and social service programs, and other community services

Eligibility Criteria
Applicant must:
• Be pregnant, breastfeeding, or postpartum (pregnant within the last 6 months); or be a child under 5 years of age
• Meet current federal income guidelines (families with a low to moderate income, and working families may qualify)
• Live in San Francisco County. Clients not residing in San Francisco can call (888) 942-9675 for the WIC Program serving their area.

Enrollment Procedures
Clients apply directly to the WIC clinic serving their neighborhood. There are six WIC clinics located throughout the city. **Call 575-5788 to locate the agency nearest to the client.** At the time of application, have the client bring:

• Proof of income
• Proof of address
• ID, such as a driver’s license, California ID card or birth certificate
• WIC medical referral form, CHDP PM 160 form or copy of the medical record containing height and weight and results of blood tests, with the date and the provider’s signature.

Languages Available
English, Spanish, Chinese (Cantonese, Mandarin, several other dialects), Tagalog, Cambodian, Vietnamese, and Thai – please check at the individual clinics when making your appointment.

Fees

(Use for agencies only)
www.sffoodbank.org

Consumers call the HELPLINK at:
Phone: (415) 808-4357

Services Description
The San Francisco Food Bank’s mission is to end hunger in San Francisco. It works toward that goal by distributing food and advocating for improvement in government food programs and policies. A nationwide network of suppliers allows the Food Bank to distribute non-perishable groceries, fresh produce, bread, and meat to community-based organizations, from senior centers and after-school programs to soup kitchens, reaching tens of thousands of individuals each month.

- **Pantry Programs**: provide donated groceries, fresh produce and USDA food to the community at nonprofit sites throughout the City

- **Emergency Food Box**: provides a three-day emergency food supply to families and individuals in crisis

- **Shopping Program**: enables nonprofit agencies to select from the Food Bank's supply of packaged groceries and fresh produce, allowing them to provide nutritious food for their meal, snack and pantry programs

Eligibility Criteria
Agencies must be a recognized nonprofit with 501(c)3 status. Agencies must be located in San Francisco.

Continued on next page

Supplemental Food Program (formerly EOC). Call 866-64357 for SBLOC locations. One 35lb box of dry & canned goods per month. For 60+ residents of San Francisco & non-WIC families with children under 6. Must provide proof of age & income.

Treasure Island Homeless Development Initiative. Building 497 Avenue I on Treasure Island (betw. 9th & 11th Sts.). 274-0311. Tues 3:30-5:30pm. Must be a Treasure Island resident. ID required. Can get 30-50 & once a week.

United Council of Human Services. 1065 Oakdale (betw. Ingalls & Griffith). 643-1700. Mon-Fri 9am-5pm. You can sign up for a monthly bag or box of canned food. Produce distributed on Wed 1:30pm. Call to find out what kind of diet you are eligible for. Free clothing (no ID needed).

Visitation Valley Family Resource Ctr. 161 Leland Ave [at Rutland]. Must register once: Tues at 161 Leland Ave. 10-10:30am, to get on the list to get food distributed Monday 3-4pm. 50 people will be served. ID and bags required. Spanish, Mandarin, Cantonese, Tagalog.

Food Stamps. Department of Human Services, 1235 Mission (betw 8th & 9th St.) 558-1000. Mon-Fri 8-11am & 1-3pm. It's best to get there as early as possible between 8-10am. Fill out an application & turn it in at the window. They will give you an appointment either that afternoon or in a few days. When you come to the appointment, they'll ask you for ID, Social Security card, Green Card if you're an immigrant) and proof of your rent, expenses, & income after which they'll check your bank accounts, etc. You should get your food stamps anywhere from 3 days up to a month. You can get up to $149 worth of food stamps per month for free (most people get less). The amount you get depends on income and how much you have to pay for rent etc.

WIC. Call 575-5788 [leave message if no answer]. Mon-Fri 8am-5pm. For women who are pregnant or who recently had a baby & for children under five years. They will refer you to WIC enrollment in one of 6 locations. Take proof of income (check stubs, Medi-Cal card) & address (California ID/PG&E or phone bill/piece of mail) & verification of pregnancy (with due date). WIC provides food vouchers, nutritional counseling & breastfeeding info & support. You can take the vouchers to some grocery stores for beans or peanut butter, & cereal, juice, eggs, milk, cheese, & iron-fortified infant formula. Women who are breastfeeding & not using formula get more of the above, plus carrots & tuna.

CONGREGATE MEAL PROGRAMS FOR SENIORS

STATEMENT OF PURPOSE

The purpose of this program is to provide nutritious meals to seniors who are ambulatory and have difficulty shopping for groceries or preparing meals. The program aims to ensure that seniors have access to healthy and balanced meals in a social setting.

DESCRIPTION OF PROGRAM SERVICES

- **For seniors who are ambulatory**, there are 50 different congregate meal sites located throughout San Francisco that serve tasty and nutritious meals. Ten different ethnic meals are available at the meal sites, including Chinese, Filipino, Japanese, Korean, Kosher, African-American, Russian, Latino, Samoan, and American/Western.

- Congregate meals are served in a warm dining room setting that abounds with friendship and opportunities to participate in various social activities.

ELIGIBILITY CRITERIA

- Senior citizens age 60 or over, and spouse or domestic partner regardless of age

ENROLLMENT PROCEDURES

Applicant signs up at site of their choice and completes registration form

LANGUAGES AVAILABLE

Services available in English, and bilingual staff usually available at the center based on the majority of ethnic consumers attending the site, including Chinese (Cantonese and Mandarin), Japanese, Korean, Russian, Spanish and Tagalog.

FEES

Donation requested

1.25
Services Description

- This non-profit service delivers prepared meals to homebound elderly, 60 years of age or older throughout San Francisco. Their mission is to provide the nutrition component that will allow homebound San Francisco seniors to remain in their homes for as long as appropriate and to foster independent living with dignity in the homebound senior population.

They provide:
- Hot, chilled, and frozen meals, which can be heated in the oven or microwave, delivered daily
- Modified diets (diabetic, low sodium/diabetic, and mechanical soft)
- Nutrition assessment and counseling
- Social work and case management intervention
- Volunteer companionship/shopping service
- A twice-weekly frozen delivery of food for 7 days (includes soups and some breakfast entrees)

Eligibility Criteria

Residents of the city of San Francisco who are:
- 60 years of age and older
- Homebound
- Limited in-home support

Continued on next page
Enrollment Procedures
They accept:
- Self-referrals
- Calls from family, neighbors, social workers, discharge planners, etc.
- The application is taken by phone. Call: (415) 920-1111

Languages Available
English, Chinese (Cantonese and Mandarin), Tagalog, Russian, Spanish, and Farsi

Fees
Suggested donation of $5.00 per day for 2-meal package is requested. Participation is not dependent on contribution; all eligible clients are served regardless of ability to pay.

Project Open Hand - HIV Program
730 Polk Street
San Francisco, CA 94109
Phone: (800) 551-MEAL or (415) 447-2326
www.openhand.org

Services Description
• Registered clients may access the Grocery Center on a weekly basis for cost free groceries (designed to meet one third of overall nutritional needs for 7 days)

• Registered clients receive an evening meal 7 days a week. Evening meals are hot or frozen depending on client preference. Meals can be home-delivered, as well as picked up at our two distribution sites and the Grocery Center.

Eligibility Criteria
Eligible clients must:
• Be a resident and provide proof of residency in the county (SF / Alameda)
• Have a valid and current photo ID (i.e. California ID / Drivers License)
• Present medical verification that they are disabled by HIV (agency provides certification of medical verification form). Client can also receive temporary services with Letter of Diagnosis that states client is disabled by HIV.
• Client must be enrolled in Project Open Hand HIV Program in order to access grocery services
• Please note: New Client intakes are by appointment only

Languages Available
Services available in English, Spanish and American Sign Language. Translator is available for 17 other Asian languages with request in advance.

Fees
No fee
Services Description

- Service consists of seven home-delivered evening meals, five nights per week
- Services are offered on a short-term basis, from three to six months, depending on medical need
- Services are designed to assist on an interim basis in a medical emergency (i.e. post surgery, medical trauma and injury), acute exacerbation of a chronic condition, or terminal prognosis
- Evening meals are designed to provide one third of daily nutritional requirements

Eligibility Criteria

- Eligible clients must be a resident and provide proof of residency in the county (San Francisco/Alameda)
- If the client is self-referring, they must complete a phone intake. If client is referred by an agency, hospital, or clinic, referring staff completes intake packet.
- Eligibility is determined and verified by a medical evaluation from client’s Primary Care Physician (form provided by agency)
- Client is under 60 years old and must be critically ill and homebound as defined by Project Open Hand eligibility criteria and verified by clients’ Primary Care Physician.

*Intake packets / certification forms available on request from Project Open Hand Client Services Department.

San Francisco Head Start/Early Head Start Program
205 13th Street, Suite 3280
San Francisco, CA 94103
Phone: (415) 405-0500
www.sfheadstart.org

Services Description
- A federally funded child development program that offers comprehensive services at no cost to San Francisco’s low income families, foster families, and recipients of supplemental income (e.g. TANF, SSI). Pregnant women/teens and families with children birth to 5 years of age are encouraged to apply. Services are offered to meet the individual needs of children with special needs. Head Start helps children develop to their maximum potential.

- There are approximately 50 Head Start centers and 8 Family Child Care Homes throughout the City. Programs include full-day, full-year/part-year programs. Program options are home-based (early Head Start), Family Child Care, and center-based. Centers are accessible to mobility impaired individuals.

- Attached is a list for the locations and phone numbers

Eligibility Criteria
- Pregnant women/teens and infants/children birth to 5 years of age
- Family must meet federal income guidelines
- Resident of the City and County of San Francisco

Enrollment Procedures
- Apply by phone, pickup an application at the main office or one of the centers, or print an application from the San Francisco Head Start website (www.sfheadstart.org).
- Drop off all completed applications to a Head Start center or mail to address above
- There may be a waiting list
Languages Available
Services are available in Chinese, Spanish and Vietnamese

• Their unique fresh salads and fresh and frozen entrees are useful in preparing quick, healthy meals.

• Vitamins and supplements, as well as household and personal items, are sold at value prices everyday.
Farmers’ markets are an excellent way to increase a community’s access to fresh produce. These markets offer opportunities for consumers to connect with local farmers, learn where their food comes from, and gain exposure to new and different local and seasonal produce items. Food purchased at these markets can often be cheaper than in the supermarket and a greater amount of the consumer’s payment goes straight to the grower, therefore helping to sustain small farmers within our region.

In the pages that follow, individual listings for farmers’ markets are included only if they accept Food Stamp benefits on an Electronic Benefit Transfer (EBT) card, Women Infant and Children (WIC) Farmers’ Market coupons, and/or Senior Farmers’ Market Nutrition coupons. Please note that prices may vary substantially from market to market.

Also in this section is a summary list of all certified farmers’ markets in San Francisco, including those that do not take WIC or Senior Farmers Market Nutrition coupons. Market locations and hours of operation are subject to change. Contact the market manager or check their website for updates. A map of farmers’ market locations is included at the end of this section.

* Seasonal market (closes for part of the year)
** Food Assistance includes EBT (food stamps), WIC and Senior Farmers’ Market Nutrition Program coupons.
The resources listed in this section assist clients, whether healthy or in poor health, evaluate their food intake and choose a healthier diet in order to promote their own well being. Services listed vary from individual nutrition counseling to group classes. Please note that access to these services varies from program to program, but many serve the low income Food Stamp eligible population. Some are available to clinic members while other services are available to the public for a fee. The programs listed here are not endorsed by the San Francisco Department of Public Health, Nutrition Services Program. For more information on available services contact the clinic, hospital or community agency directly.

Interpreters are available in many languages
Arrangements should be made at the time the appointment is made

Fees
• Call for fees
• Accepts most major insurance carriers
Services Description
This is a federal nutrition program for pregnant, breastfeeding or postpartum women, and for children under 5 years of age. All WIC services are free. WIC provides:

Nutrition Education
- Individual dietary counseling of high-risk clients by a nutritionist/registered dietitian
- Group/individual discussions on various nutrition topics with emphasis on behavior modification techniques

Supplemental Foods
- The WIC program issues vouchers every month redeemable at local retail food outlets. WIC foods provide Vitamins A, C and D, and iron, protein, and calcium
- For information on foods received, see Food Resources section

Breastfeeding Support
- Manual breast pumps are provided to breastfeeding women
- Electric breast pumps are loaned to women meeting qualifying criteria
- Certified Lactation Educators are available to assist clients with lactation management and breastfeeding related issues
- Breastfeeding video loan program (English or Spanish)
- Breastfeeding classes for prenatal clients

Referrals to Health Care and Social Services
- Staff provides appropriate information and referrals for health care and social service programs and other community services

Continued on next page
Women, Infants, and Children Supplemental Nutrition Program, Nutrition Counseling, cont.

Eligibility Criteria
- Be pregnant, breastfeeding, or a postpartum woman (pregnant within the last 6 months)
- Be a child under 5 years of age
- Meet current federal income guidelines (families with a low to moderate income, and working families may qualify)
- Live in San Francisco County
- Clients not residing in San Francisco can call (888) 942-9675 for a WIC Program serving their area

Enrollment Procedures
Clients apply directly to the WIC clinic serving their neighborhood. There are five WIC clinics located throughout the city; call (415) 575-5788 to locate the agency nearest to your client or see chart on page 2.27 for specific clinic locations.

At the time of application, client must bring:
- Proof of income
- Proof of address
- ID: driver’s license, California ID card or birth certificate
- WIC medical referral form, CHDP PM 160 form or copy of the medical record containing height and weight and results of blood tests, with the date and the provider’s signature

Languages Available
English, Spanish, Chinese (Cantonese, Mandarin, several other dialects), Tagalog, Cambodian, Vietnamese, and Thai – please check at the individual clinics when making your appointment.

Fees
No fee

This section includes programs that help individuals and groups achieve a weight that can support their well being. Programs listed here provide workshops and classes with a specific focus on weight issues and many provide services to the low income Food Stamp eligible population. This section also includes a list of organizations and materials that deal specifically with eating disorders. **These programs are not endorsed by the San Francisco Department of Public Health, Nutrition Services Department.** To make appointments, contact the individual weight management programs.
Eating Disorders Resource List

The following resources were listed in the UC Berkeley Center for Health and Weight website at www.nature.berkeley.edu/cwh/index.html, under organizations and links.

After the Diet™
A network of professionals dedicated to helping people overcome eating problems. The group recognizes that in the majority of cases, diets do not work, and are working together to find options that help those who feel that their attitudes and behaviors regarding food, weight, and exercise are no longer in control. The site provides information on a spectrum of products and services for individuals with eating problems related to stress, trauma, and similar problems, and for the professionals who help them. www.afterthediet.com/

Anorexia and Related Eating Disorders
This nonprofit organization provides information about anorexia nervosa, bulimia nervosa, binge eating disorder, compulsive exercising, and other less well-known food and weight disorders. www.anred.com/index.html

Beyond Hunger
Beyond Hunger is dedicated to helping individuals overcome the obsession with food and weight by providing the support, education and skills necessary to develop a positive and nurturing relationship to food, body and self. Beyond Hunger provides public programs that integrate the philosophies of intuitive eating, emotional wisdom and body acceptance that are essential to complete recovery from eating disorders. Beyond Hunger provides on-going support groups for adults and teens, one- day workshops, referral services, and prevention and education programs. www.beyondhunger.org/

Eating Disorders Resource List, cont.

Body Image and Size Acceptance Connection
Part of the UC Berkeley Department of Nutritional Sciences Extension website, links to resources include eating disorders and size acceptance organizations and literature, and many kids' health and nutrition websites.
[nature.berkeley.edu/departments/nut/extension/ceproj/home/home.html](nature.berkeley.edu/departments/nut/extension/ceproj/home/home.html)

Eating Disorders Coalition for Research, Policy & Action
The Eating Disorders Coalition is a cooperative of professional and advocacy-based organizations committed to federal advocacy on behalf of people with eating disorders, their families, and professionals working with these populations.
[www.eatingdisorderscoalition.org](www.eatingdisorderscoalition.org)

Eating Disorders: A Food & Nutrition Resource List for Consumers
A compilation of resources on eating disorders for the consumer, developed by Food and Nutrition Information Center (FNIC), provided on-line or by mail request. The materials on this list were recommended by eating disorder professionals or found on suggested reading lists of prominent organizations.

Harvard Eating Disorders Center
Advances the understanding, prevention, and treatment of eating disorders through research, education, and outreach. Staffed by leaders in the field, the center spearheads research into the causes and treatments for eating disorders, as well as their associated medical and psychological conditions. [www.hedc.org/](www.hedc.org/)

Healthy Weight Network
Weight and eating books and information by recognized scientific experts. The site offers scientific research on dieting, the failure of weight loss programs, eating disorders, obesity, overweight, size acceptance, diet quackery, and moving ahead with the nondiet health at any size paradigm. [www.healthyweight.net/](www.healthyweight.net/)

Continued on next page
Eating Disorders Resource List, cont.

National Association of Anorexia Nervosa and Associated Disorders (ANAD)
The oldest national nonprofit organization helping eating disorder victims and their families. Offers free hotline counseling, an international network of support groups for sufferers and families, and referrals to health care professionals, who treat eating disorders, across the US and in fifteen other countries.  www.anad.org/site/anadweb/

National Eating Disorders Association (NEDA)
NEDA was formed in 2001 when the Eating Disorder and Prevention (EDAP) merged with the American Anorexia Bulimia Association, two of the largest eating disorder organizations in the world.

NEDA is the largest nonprofit organization in the United States working to provide programs, products and services to help prevent, treat, and cure eating disorders as well as promote of access to these through education, advocacy, and research.

The site includes many "printer-ready" resources, including "10 Things Parents Can Do to Help Prevent Eating Disorders."

National Eating Disorders Organization (NEDO)
Part of the NEDA alliance

Provides eating disorders and obesity education, consultation, research, and treatment referral services nationally and internationally.  www.kidsource.com/nedo
(See also  www.nationaleatingdisorders.org/p.asp?WebPage_ID=337)

The Renfrew Center
A women's mental health center and an innovative resource in education and treatment for eating disorders (anorexia, bulimia & compulsive overeating), trauma, anxiety, depression and women's issues. The Center has 7 locations in 5 states.
www.renfrew.org/
Services Description

Weight Management 101
- Foundations in Weight Management is a one-session class to help participant determine his/her readiness to make lifestyle changes for weight loss and weight management
- This class gives information on the relationship between health and weight, effects of dieting, successful weight loss and management strategies and weight management resources

Get Moving
- Get Moving Overview is a one-session class that gives basic information and guidelines about physical activity
- The class also helps participant develop a personal physical activity plan. This plan is based on activities participant enjoy as well tips to help him/her overcome any physical activity barriers he/she may have

Lifestyle and Weight Management Multi-Session Program
- The program’s goal is to teach you a variety of tools to help make lifestyle changes for long term weight management
- These tools include goal setting, mindful eating, physical activity planning, social support, food shopping and eating out and more
- The focus is on learning how to maintain healthy lifestyle habits and a healthy weight

Continued on next page
Cultivating Health Weight Management Kit
- This is a self-paced do-it-yourself program focusing on long-term weight management skills
- Cultivating Health contains exercises and tools to help participant make decisions about lifestyle changes
- The program materials are available in most Health Education departments
- A few medical facilities also offer a short interactive class to go with the self-paced program

Internet Options
- Personalized on-line programs featured on www.kp.org to help participant manage his/her weight through lifestyle changes
- Nourish gives participant personalized strategies for making smart and delicious food choices to increase energy, manage weight, and live a longer, healthier life
- Balance gives participant personalized weight loss strategies for reaching his/her ideal healthy weight with a program that's helped thousands of people lose weight and keep it off

Eligibility Criteria
Available to Kaiser members and members of the public.
See Fees below for more details.

Languages Available

The American Dietetic Association (ADA) is the nation’s largest organization of food and nutrition professionals with nearly 70,000 members, the majority of whom are registered dietitians. The goal of the ADA is to serve the public by promoting optimal nutrition, health, and well being.

**POSITION STATEMENT**

"It is the position of the American Dietetic Association that successful weight management to improve overall health for adults requires a lifelong commitment to healthful lifestyle behaviors emphasizing sustainable and enjoyable eating practices and daily physical activity.”

**ABSTRACT**

It is the position of the American Dietetic Association that successful weight management to improve overall health for adults requires a **lifelong commitment to healthful lifestyle behaviors emphasizing sustainable and enjoyable eating practices and daily physical activity**. Americans are increasing in body fat as they become more sedentary. Obesity has reached epidemic proportions and health care costs associated with weight-related illnesses have escalated. Although our knowledge base has greatly expanded regarding the complex causation of increased body fat, little progress has been made in long-term maintenance interventions with the exception of surgery. **Lifestyle modifications in food intake and exercise remain the hallmarks of effective treatment**, but are difficult to initiate and sustain over the long term. The dietitian can play a pivotal role in modifying weight status by helping to formulate reasonable goals which can be met and sustained with a healthy eating approach as outlined in the Dietary Guidelines for 2000.

*Continued on next page*
**Weight Management and Resources Information, cont.**

Any changes in dietary intake and exercise patterns which decrease caloric intake below energy expenditure will result in weight loss, but it is the responsibility of the dietitian to make sure the changes recommended are directed toward improved physiological and psychological health. A thorough clinical assessment should help define possible genetic, environmental, and behavioral factors contributing to weight status and is important to the formulation of an individualized intervention. The activation of treatment strategies is often limited by available resources and cost. Reimbursement by third party payers for services is limited. Health care dollars are consumed for treatment of weight related diseases. Public policy must change if the obesity epidemic is to be stopped and appropriate weight management techniques activated.

In the past decade, our growing knowledge of the genetic, physiological, psychological, metabolic, and environmental influences on body weight has increased our awareness of complexities of weight management. New research has provided a basis for evaluating our traditional intervention strategies and outcome goals. Americans are gaining weight at an alarming rate (1). Obesity is rapidly becoming an epidemic in this country. A sedentary life coupled with access to an abundance of energy-dense food has led to an increase in this chronic disease with national health care costs reaching $70 billion per year (2,3).

Currently, available data on lifestyle weight loss interventions indicate that they produce low levels of sustained loss (4). Typically reported weight losses remaining after 4-5 years are about 3% to 6% of initial body weight (5). A 5% weight loss does have health benefits and counters weight gain that may have occurred if one had not been involved with weight loss strategies. There is a prevailing need for dietetics professionals and other health care professionals to document outcomes on weight loss programs/interventions, since there is limited data from commercial, hospital, and other interventions. Many people are spending a considerable amount of money on weight loss programs, and outcome data is needed to document the effectiveness of these. For most people who are overweight or obese, treatment recommendations are based on decreasing caloric intake, increasing physical activity, and making permanent, healthy lifestyle changes. Self-reports from individuals who lose weight and keep it off on their own, without professional support, indicate that these individuals are able to sustain changes in physical activity and food intake over time (5-7). Evaluating the efficacy of weight management strategies depends on identifying outcome goals.

*Continued on next page*
Weight Management and Resources Information, cont.

Traditionally, evaluation has been on total weight loss; it is now realized that prevention of weight gain as well as weight loss and improving health status are important goals. We must move away from assuming that weight management is synonymous with the achievement of slenderness. Rather than recommending an unrealistic weight loss which is usually not achieved or maintained, patients must be helped to achieve and accept a healthier weight and adopt healthier lifestyles that lead to reducing health risks (8).

Given our current obesity-conducive environment, significant change will require a concerted effort by both public and private sectors to address the environmental contributors to both childhood and adult obesity. Dietitians and other health care providers also have a responsibility to address these public health issues. While this paper doesn’t specifically concentrate on pediatric and adolescent obesity, the general concept about lifestyle can apply to this population.”

REFERENCES

**A Healthier You!**

Fad diets, diet pills, and even surgery are all approaches that are becoming dangerously more popular in reaching for the quick fix in weight loss. With the countless number of weight loss schemes and claims out there, accurate nutrition information is becoming altered and diluted. The commonality in most fad diets is that they are low in calories and may help someone lose weight initially. Where most fad diets fall short is providing accurate nutrition information and support to maintain the weight loss.

Most nutrition experts will agree that the cornerstones of successful weight maintenance is a lifelong commitment to eating a balance of whole foods coupled with regular physical activity. Food sources should consist of variety of whole grains and legumes, fruits, vegetables, lean proteins, low fat dairy products, and healthy fats (omega 3 & omega 6 fatty acids) and should limit refined foods, packaged and processed foods, high sugar foods, foods high in trans-fatty acids (partially/fully hydrogenated oils).

**The following information is a brief analysis of two of the most common weight loss diets.**

**Low-Fat Diets**

These diets plans limit the amount of total fat and saturated fat while allowing moderate amounts of lean protein, low-fat dairy, and more carbohydrates (with the focus on complex carbohydrates). Fat is limited to less than 30% of the total calories, less than 10% from saturated fats, and avoiding trans fatty acids coming from foods with partially hydrogenated oils. Fat is the densest in calories at 9 calories per gram. The idea is the less fat eaten, the less calories consumed, thereby aiding in weight loss efforts of consuming less total calories.

*Continued on next page*
Furthermore, a low-fat diet is also lower in dietary cholesterol which has been shown to prevent heart disease and some cancers. Non-fat diets are discouraged since some fats are essential for bodily functions. The fats recommended in small amounts are unsaturated (mono- and poly-). Moderate portions of low-fat dairy products and lean proteins like beans, fish and poultry are highly encouraged instead of whole-fat dairy products and red meats. Fruits and vegetables are allowed in abundance since these foods are low in fat and calories and provide many vitamins, minerals, and fiber.

**Low-Carbohydrate ("Low Carb") Diets**

Diet plans like these restrict carbohydrates and are usually high in protein. Fruits, many vegetables, whole grains and legumes, and low-fat dairy products are typically not allowed in the initiation phase, and allowed in very limited quantities in the maintenance phase of the diet. Other sweets containing sugar, high fructose corn syrup, glucose, fructose, lactose, and other forms of sugars and sugar substitutes are typically not allowed. Protein sources are usually from red meat, chicken, pork, eggs, fish, shellfish, and nuts. A typical breakdown of a low-carbohydrate diet after the initiation phase may be 40% protein, 40% fat (any type), and 20% carbohydrate.

Some low carbohydrate diets refer to the glycemic index of foods. The glycemic index is a ranking system for carbohydrates based on how fast they break down in the body. Foods with a high glycemic index break down quickly in the body when eaten alone. Those foods include simple carbohydrates, such as white bread, white rice, sweet cereals, and sugary foods. Foods with a low glycemic index break down slower when eaten alone, and those foods include complex carbohydrates, whole-grain bread and cereals, brown rice, and vegetables. The theory behind the glycemic index is that when high glycemic foods are eaten, the blood sugar rises rapidly, thereby putting extra stress on the pancreas to release more insulin to process these sugars. It is important to remember that the body processes different foods at different rates, especially when eaten together. During meal times, we tend eat foods that digest slower with those that may digest quicker, so effect on blood sugar will likely not be so dramatic.

Avoiding high sugar foods such as soda, fruit drinks, cookies and cakes eliminates unnecessary calories, however, by avoiding grains, dairy, and produce, the diet may lack certain vitamins & minerals as well as fiber. That is one reason why diet plans like these try to sell their specific brand of multivitamin & mineral supplement and specialty line of foods (often expensive).

*Continued on next page*
Furthermore, since the body is not given sufficient carbohydrates to facilitate overall metabolism, the body begins to break down fats into acids called ketones. This process, ketosis, can cause weakness, nausea, dehydration, loss of calcium, bad breath, and can exacerbate problems with the kidney, liver, gout, and lipid abnormalities. The weight loss is usually due to water loss, not body fat, and is usually quickly regained when the diet is not followed.

VEGETARIANISM

American Dietetic Association Position Statement, Abstract (revised 2000)

POSITION STATEMENT

“It is the position of the American Dietetic Association and Dietitians of Canada that appropriately planned vegetarian diets are healthful, nutritionally adequate, and provide health benefits in the prevention and treatment of certain diseases.”

ABSTRACT

It is the position of the American Dietetic Association and Dietitians of Canada that appropriately planned vegetarian diets are healthful, nutritionally adequate, and provide health benefits in the prevention and treatment of certain diseases. Approximately 2.5% of adults in the United States and 4% of adults in Canada follow vegetarian diets. A vegetarian diet is defined as one that does not include meat, fish, or fowl. Interest in vegetarianism appears to be increasing, with many restaurants and college foodservices offering vegetarian meals routinely. Substantial growth in sales of foods attractive to vegetarians has occurred, and these foods appear in many supermarkets. This position paper reviews the current scientific data related to key nutrients for vegetarians, including protein, iron, zinc, calcium, vitamin D, riboflavin, vitamin B-12, vitamin A, n-3 fatty acids, and iodine. A vegetarian, including vegan, diet can meet current recommendations for all of these nutrients. In some cases, use of fortified foods or supplements can be helpful in meeting recommendations for individual nutrients. Well-planned vegan and other types of vegetarian diets are appropriate for all stages of the life cycle, including during pregnancy, lactation, infancy, childhood, and adolescence. Vegetarian diets offer a number of nutritional benefits, including lower levels of saturated fat, cholesterol, and animal protein as well as higher levels of carbohydrates, fiber, magnesium, potassium, folate, and antioxidants such as vitamins C and E and phytochemicals. Vegetarians have been reported to have lower body mass indices than nonvegetarians, as well as lower rates of death from ischemic heart disease; vegetarians also show lower blood cholesterol levels; lower blood pressure; and lower rates of hypertension, type 2 diabetes, and prostate and colon cancer. Although a number of federally funded and institutional feeding programs can accommodate vegetarians, few have foods suitable for vegans at this time. Because of the variability of dietary practices among vegetarians, individual assessment of dietary intakes of vegetarians is required. Dietetics professionals have a responsibility to support and Continued on next page
Vegetarianism, cont.

encourage those who express an interest in consuming a vegetarian diet. They can play key roles in educating vegetarian clients about food sources of specific nutrients, food purchase and preparation, and any dietary modifications that may be necessary to meet individual needs. Menu planning for vegetarians can be simplified by use of a food guide that specifies food groups and serving sizes.”

Quantity Food Preparation:

Vegetarian Resource Group
http://www.vrg.org/fsupdate/
This section includes organizations and programs that provide instruction and/or enforce regulations regarding the safe handling and preparation of food in restaurants and other (commercial and charitable) food establishments. Also included in this section is basic information that may be useful to providers who either prepare food for distribution or supervise someone who does (e.g. hygiene, food borne illness, health codes). This information can be of use to organizations and programs serving the low income Food Stamp eligible population.
FOOD SAFETY

Certified Food Handler Information

- California Food Safety Law requires at least one employee at each retail food facility be certified as a food safety person by passing an approved examination. The certified person can be the owner, manager, chef, cook or any employee responsible for safe food handling and who may ensure that other employees use proper food handling techniques.

- The all-day food handling training covers: the causes of food poisoning and ways to prevent it, time and temperature controls, cross contamination, cleaning and sanitizing, and pest control. Participation in the training does not guarantee passage of the exam.

- All classes are held at 1390 Market Street, Suite 910, San Francisco, CA 94102. Each 8-hour class starts at 8:30 a.m. and usually ends at 5:00 p.m. Classes are offered in either English or Cantonese Chinese languages. If you would like to take the exam in Vietnamese, Korean, Arabic, or Spanish, you must PRINT that next to your name on the registration form and enroll for class at least 30 days in advance.

- Three options are offered by SFDPH, with different registration fees for each: Course and Examination, Examination only, and Recertification only.

- To sign up for a class or exam, contact the SFDPH Environmental Health Section by phone (415) 252-3800 or (415) 252-3846 or in person at 1390 Market Street, Suite 210. Information is also available at the following website: http://www.sfdph.org/eh/food/index_classes.htm
FOOD SAFETY

Federal Websites Providing Food Safety Information

http://www.foodsafety.gov/
Gateway to Government Food Safety Information
Includes news and safety alerts, consumer advice, industry assistance, information on food borne pathogens, national food safety programs, reporting illnesses and product complaints, and federal and state government agencies.

http://vm.cfsan.fda.gov/
U.S. Food and Drug Administration (FDA)
Center for Food Safety and Applied Nutrition (CFSAN)
CFSAN is responsible for promoting and protecting the public's health by ensuring that the nation's food supply is safe, sanitary, wholesome, and honestly labeled, and that cosmetic products are safe and properly labeled. FDA's responsibility in the food area generally covers all domestic and imported food except meat, poultry, and frozen, dried and liquid eggs, which are under the authority of the U.S. Department of Agriculture’s Food Safety and Inspection Service (FSIS), the labeling of alcoholic beverages and tobacco, which are regulated by the U.S. Department of the Treasury's Bureau of Alcohol, Tobacco, and Firearms (ATF), and the U.S. Environmental Protection Agency (EPA), which establishes tolerances for pesticide residues in foods and ensures the safety of drinking water.

http://www.fsis.usda.gov/
U.S. Department of Agriculture (USDA)
Food Safety and Inspection Service (FSIS)
FSIS is the public health agency in the U.S. Department of Agriculture responsible for ensuring that the nation's commercial supply of meat, poultry, and egg products is safe, wholesome, and correctly labeled and packaged.

http://www.epa.gov/pesticides/food/
http://www.epa.gov/ebtpages/humafoodsafety.html/
U.S. Environmental Protection Agency (EPA)
These websites answer questions about pesticides and food, including how the government regulates pesticides, what the residue limits are on food, why children may be especially sensitive to pesticides, "Integrated Pest Management", "organically grown" food, types of pesticides on foods, health problems pesticides may pose, and healthy, sensible food practices.
Services Description

- The USDA/FDA Food Borne Illness Education Information Center provides information about food borne illness prevention to educators, trainers, and organizations developing education and training materials for food workers and consumers.

- The Center created and maintains two databases of educational materials:
  - Hazard Analysis Critical Control Points (HACCP) Training Programs and Resources Database
  - Food Borne Illness Educational Materials Database

- The Center also provides networking opportunities for food safety professionals through Foodsafe, an e-discussion group where resources, information and innovative solutions to food safety problems can be shared.

- Food Safety Links highlights topic areas such as consumer information, food borne illness statistics, food borne pathogens, food safety clip art, retail food safety, seafood and more.

- Members of the Center also serve as Information Managers for the Food Safety Training and Education Alliance (FSTEA), an organization which provides resources for retail, food service, vending, institutions, and regulators.

- The Center is part of an interagency agreement between the Food Safety and Inspection Service (FSIS) of the United States Department of Agriculture (USDA) and the Food and Drug Administration (FDA) of the United States Department of Health and Human Services. It is managed through a cooperative agreement with the University of Maryland.
Food Borne Illness Information

- Food borne Illness (FBI) is sickness that is caused by eating or drinking contaminated food or beverage. FBI outbreak is defined by the FDA Food Code as any sickness involving two or more people who had eaten the same food or food from a common source. Laboratory tests can prove the association.

- Potentially Hazardous Foods (PHFs) are foods in which germs can grow rapidly. PHFs include milk and milk products, shell eggs, meats and poultry, fish and shellfish, crustaceans, cooked vegetables, cooked low-acid foods, tofu and soy protein products, beans and lentils, sliced melons, and raw seed sprouts. Pasteurized products such as eggs and milk are still treated as PHF’s. The #1 cause of bacterial FBI is improper cooling of hot food.

- A food borne infection is a disease that results from eating food containing living harmful microorganisms (germs). These kinds of germs attack the gut lining and invade the body. Symptoms include nausea, vomiting and/or diarrhea, and fever. Example of a bacterium, and a parasite that cause infections: Salmonella (found in animals, especially poultry and eggs, and in humans) and Trichinella Spiralis (found in domestic pigs and wild game). Example of viruses that cause infections: Noro viruses (found in human feces and vomitus of carriers and contaminated water) and Hepatitis A (found in human feces of carriers and contaminated water).

- A food borne intoxication is a disease that results from eating food contaminated with poisons or toxins (waste products) from bacteria, molds, or chemicals. These toxins are odorless, tasteless, and colorless. They can cause illness even after the germs in the food have been killed (i.e. by cooking). Examples of bacteria that cause intoxications: Staphylococcus aureus (found in the nose, on hands and skin, in cuts, burns, boils and pimples) and Bacillus cereus (found in meat, poultry, vegetables, and in grain products).

- A toxin-mediated infection is a disease that results from eating food containing live germs. These germs colonize the stomach or intestine and make toxins as they live and grow. An example of a bacterium that causes a toxin-mediated infection: Escherichia Coli 0157:H7 (found in human and animal feces and thus in contaminated raw or undercooked ground beef and red meats, unpasteurized fruit juices, and contaminated raw fruit).

To report suspected food poisoning, call: (415) 252-3895 (Environmental Health Section).
To report outbreaks of food borne illness involving four or more persons, call: (415) 554-2830.

This information is from Lawrence Pong, REHS, Principal Inspector & Manager of Training, San Francisco Department of Public Health’s Environmental Health Section.
Services Description

- GGRA offers Food Safety Certification Courses and tests for employees of food facilities. With a passing test score, this course satisfies AB 1978 (Campbell Bill) which requires specified food facilities to employ at least one certified person in their establishment.

- In addition to regularly scheduled Food Safety Certification Classes, GGRA also holds seminars on topics that members have expressed interest in. Some past seminar topics have included CPR Training, Workers' Compensation, Taxes and Tips, and Labor Laws.

Languages Available

- Food Safety classes are offered on a regular basis in English and Spanish. Tests are available in the following languages: English, Chinese, Spanish, Korean, and Vietnamese.
FOOD SAFETY

Restaurant Inspections and Violations

- According to California Health and Safety Code (effective January 1, 2002), a copy of the most recent inspection report shall be maintained at all food facilities (e.g. restaurants, bars, markets). The food facility shall post a notice advising patrons that the copy of the most recent inspection report is available for review.

- Inspection reports can be reviewed at the SFDPH Environmental Health Section office during business hours. Please make an appointment for viewing so that the files will be available at the appointed time.

- Detailed descriptions of the violations recorded by Food Inspectors are based on SB180. *High risk Violations* are those violations that pose an imminent risk to public health and warrant immediate closure of the food establishment or immediate correction. *Low risk Violations* are those that do not pose an imminent public health risk, but do warrant correction. Examples of violations include the following:
  - Improper holding temperature
  - Inadequate cooking
  - Poor personal hygiene of food handlers
  - Contaminated equipment
  - Food from unsafe sources

In addition to the above criteria, SFDPH Environmental Health has added the following inspection categories:
  - Structural repairs
  - Vermin (mice, rats, other inspects and/or animals)
  - Other (violations to include, but not limited to smoking, sewage or the absence of a valid food handler’s certificate)

To access information on local restaurants’ inspections and violations, you can make an appointment to visit the SFDPH Environmental Health Section office (1390 Market Street, Suite 210) during business hours by calling (415) 252-3800. You can also search for a specific food facility by name on the following website: [www.dph.sf.ca.us/eh/Violations/Loc_Search.asp](http://www.dph.sf.ca.us/eh/Violations/Loc_Search.asp)
Services Description
The Consumer Protection Division of Environmental Health Section assures that food provided for human consumption is wholesome and is produced under safe and sanitary conditions. The Food Program consists of the following principal services:

- Issuing Permits to Operate for all retail facilities
- Conducting inspections of restaurants, bars, markets and miscellaneous food operations such as concessions, pushcarts, and mobile food units
- Enforcing health code regulations, which may result in administrative actions and suspensions of the Permit to Operate when violations are identified
- Tracking restaurant violations in accordance with 1999-2000 Senate Bill 180
- Issuing permits at special events (street fairs and festivals, musical and artistic presentations, small sport events, annual national days and ethnic celebrations, trade shows and products introductions at which food is sold or given away to the public) and ensuring that food handling practices employed throughout the City are in compliance with applicable health codes
- Educating food facilities operators on safe food handling practices
FOOD SAFETY

Saving Leftover Food

1. If you can't refrigerate / freeze leftovers within two hours from time of service, toss them.
   If pre-cooked food is left out too long, some bacteria, such as staphylococcus aureus (staph), can grow in the food and form a heat-resistant toxin that re-heating can't destroy. Perishable foods include: meat, poultry, seafood, dairy products, cooked pasta, cooked rice, cooked vegetables, and fresh, peeled and/or cut fruits and vegetables.

2. Cool leftovers quickly in shallow containers in your refrigerator.
   Refrigerate and cool leftovers in shallow containers; limit food depth to about two inches. Protect hot leftovers from cross-contamination from other foods by storing them on the top shelf of the refrigerator. Cover them LOOSELY so the food cools faster; then, cover them tightly when they're cool. Cold leftovers such as salads and pies should be covered and refrigerated immediately. Store packages of raw meat, poultry or seafood on the BOTTOM shelf of your refrigerator so their juices don't drip onto other foods.

3. Eat leftovers in one to two days or freeze them for longer storage.
   For best safety and quality, eat leftovers in a day or two. Or, freeze them at 0 degrees F if you'd like to keep them longer. Thaw frozen leftovers in the refrigerator, as part of the cooking process, or in your microwave. If food is thawed in the microwave, cook it right away. Unlike food thawed in a refrigerator, microwave-thawed foods reach temperatures that encourage bacterial growth. At 0 degrees F, frozen leftovers are safe indefinitely; however the U.S. Dept. of Agriculture Food Safety and Inspection Service (USDA/FSIS) recommends most foods will have best quality if used within two to four months.

4. Reheat leftovers to 165 degrees F.
   Reheat leftovers until they're steaming hot THROUGHOUT. At this temperature, harmful bacteria should be destroyed. Stir to promote even heating. Remember to follow the "two hour rule" regardless of how high and how long you heat a food.

5. When in doubt, toss leftovers out.
   Toss leftovers if you left them on the car seat overnight, let them sit over a week in the refrigerator, or forgot your frozen leftovers on the kitchen counter all day.

This information is from Food Reflections, a free monthly e-mail newsletter from University of Nebraska Cooperative Extension. Food Reflections provides a "how-to" message on food, nutrition, or food safety for health professionals, educators, and consumers. The newsletter is archived online at the following site: http://lancaster.unl.edu/food/archives.htm.
This section includes organizations that act in an educational and/or advocacy capacity around the food system, including those who serve the low income Food Stamp eligible population. The “food system” includes any and all processes involved in keeping us fed: growing, harvesting, processing, packaging, marketing, distributing, cooking, and disposing. Organizations listed here can be important resources for providers who would like to understand more “where their food comes from” and how they might be able to play a role in influencing these decisions. Some organizations offer tours, classes, workshops, or have email lists for educational and/or advocacy purposes. Organizations listed here work towards such goals as community food security, sustainable food systems, and environmental justice. This section will also show you how you can connect with small, regional farmers or conduct research that will illustrate the status of your local food system.
Center for Agroecology and Sustainable Food Systems
University of California, Santa Cruz
1156 High Street
Santa Cruz, CA 95064
Phone: (831) 459-3240

Description
- The Center for Agroecology & Sustainable Food Systems is a research, education, and public service program at the University of California, Santa Cruz (UCSC), dedicated to increasing ecological sustainability and social justice in the food and agriculture system.

- On the UCSC campus, the Center operates the two-acre Alan Chadwick Garden and the 25-acre Farm. Both sites are managed using organic production methods and serve as research, teaching, and training facilities for students, staff, and faculty of the university.

- The Center offers a six-month apprenticeship in ecological horticulture, which includes practically training in organic gardening and small-scale farming for successful applicants over 18 years of age.

- The Center also offers farm tours for school and community groups, free and low cost gardening workshops, classes and events for kids.

- The Center’s website has a list of publications posted, including research briefs, crop specific information, and general gardening information.

• The Garden for the Environment (GFE) educates San Franciscans about urban gardening and composting in a variety of settings and capacities.

• The GFE website includes a calendar with free and low cost workshops offered, a list of community gardens in San Francisco, a number of important resources and contacts for getting raw materials and technical assistance, as well as a reading list.

• GFE programs are divided into the five main areas outlined below:
  ° Home Composting Education Program
  ° Gardening & Composting Educator Training Program
  ° School Education Program
  ° Resource Efficient Landscape Education
  ° Urban Gardening Internship
Hidden Villa
26870 Moody Road
Los Altos Hills, CA 94022
Phone: (650) 949-8650
www.hiddenvilla.org

Description

• Hidden Villa is a 1,600 acre farm & wilderness preserve in Los Altos Hills, teaching environmental and multicultural awareness to both children and adults. For many visitors, particularly those from urban areas, Hidden Villa provides an opportunity to walk in the woods, come face to face with a large and friendly farm animal, and see where milk & eggs come from.

• Hidden Villa’s programs unite diverse people and encourage respect for our connectedness to each other and to all living things:

  ° Multicultural summer camp programs for ages 6-18
  ° Environmental education programs for elementary school classes
  ° Community programs offer insightful forums, hikes, and cultural performances
  ° Group rental facilities
  ° Hostel for international and local visitors
  ° Fresh organic produce from the Community Supported Agriculture Program
  ° Kids' activities and programs on weekends for youth and families
  ° Volunteer & internship opportunities in the programs, from organic gardening to trail maintenance to office administration—for ages 15-95
Merritt College Landscape Horticulture Program
12500 Campus Drive
Oakland, CA 94619
Phone: (510) 436-2418
www.merrittlandhort.com

Description

- Facilities include 5,000 ft$^2$ of greenhouses, a 5000 ft$^2$ lath house, a floral and drafting lab, library, arboretum, and horticultural equipment.

- Associates Degrees and certificates are offered in the following areas:
  - Environmental Program Core Certificate
  - Ecological Restoration
  - Environmental Management and Restoration Technology
  - Human Ecology
  - Environmental Design and Energy Technology
Description

- New College offers a 12-month Master of Arts Program in Ecological Agriculture, a 20-month Masters in Business Administration Program in Environmental Entrepreneurship, and Core Leadership Seminars in the area of Ecology and Sustainable Agriculture.

- Students in this concentration of Ecological Agriculture explore the natural, economic, and societal aspects of growing food; practice permaculture and biointensive farming methods; learn principles of ecologically-rooted agricultural systems; plan and nurture a garden; and visit farms and projects.
Description

- The mission of *Preparing the Ground: The Green Classroom Project* is to support public school gardens by collaborating and partnering with the San Francisco Unified School District's Facilities Management Department in order to build and maintain sustainable gardens.

- The Director of Educational Gardens supports public schools in San Francisco by providing technical assistance, links to other school gardens and to other resources.

- The goals and activities of *Preparing the Ground: The Green Classroom Project* are the following:
  - Support school gardens by building sustainable garden systems;
  - Adapt and disseminate core curriculum that fits SFUSD core standards;
  - Build a network of garden coordinators in the district through a website, list serve and regular meetings;
  - Support teachers in finding and teaching students about ecology, nutrition and health; and
  - Develop and maintain a resource library for teachers and garden coordinators.
Santa Rosa Junior College Shone Farm
Agriculture/Natural Resources Department
Room 2092, Lark Hall
1501 Mendocino Avenue
Santa Rosa, CA 95401-4395
Phone: (707) 527-4649
Shone Farm: (707) 887-1187
Garden at Shone Farm: (707) 887-0740
www.santarosa.edu/instruction/instructional_departments/agriculture/shonefarm/

Description

• Shone Farm offers an Associates in Science degree and two certificates in Sustainable Agriculture. The Associates degree program trains farmers and gardeners in the techniques of sustainable food production and provides a foundation in plant and soil science, integrated pest management, and ecological agriculture and emphasizes the how-to aspects of organic gardening and farming, including tillage, compost production, and crop planning and production.

• The 365 acre Shone Farm includes land for the production of vegetables, fruits, cut flowers, pasture land, timber, vineyards, gardens, greenhouses, and insect landscapes.

• SRJC students learn by doing; they engage actively in their learning experience by working on SRJC's Shone Farm, participating in the production and distribution of sustainable agriculture products, and participating with local farmers to discover and support best practices.

• Shone Farm also supports 4H/FFA field days, short courses, and industry meetings each year.
Description

- Slide Ranch is a non-profit agricultural and environmental education center located just north of San Francisco. As a Park Partner with the Golden Gate National Recreation Area (the GGNRA), Slide Ranch is the steward of 134 acres of land. Although all parts of the land are accessible by coastal trails, the farm and residential part of the site occupy only about twenty acres of the ranch. Slide Ranch uses food to teach about sustainability and to demonstrate a vision of humans in balance with nature. Slide Ranch teaches practical lessons about basic human needs - food, clothing, and community - in order to promote:
  - an awareness of agriculture, its processes and products
  - a more sustainable use of natural resources
  - a personal sense of connection to the natural world
  - healthy relationships with others and with the environment

- Slide Ranch uses the garden, compost, animals, hiking trails and tidepools to teach people the concepts involved in organic food production, resource conservation and recycling, animal husbandry, open space conservation and the responsibility that we all have in sustaining a healthy environment.

- Slide Ranch offers site reservations, group programs (including daytime and overnight options), family farm days, and farm tours.
California Certified Organic Farmers (CCOF)
1115 Mission Street
Santa Cruz, CA 95060
Phone: (831) 423-2263
www.ccof.org

Description

- CCOF certifies all stages of organic production and sales in California, the U.S. and internationally. CCOF is accredited by the International Federation of Organic Agricultural Movements and by the U.S. Department of Agriculture.

- CCOF certifies organic farmers, processors, retailers, and wholesalers who comply with USDA International organic standards. CCOF inspectors examine the producer’s crops, land, facility, process, and paperwork.

- The CCOF website includes information on organic standards, an online and printed directory of organic farmers, processors, handlers, packers and retailers, and a media resource page with press kits and fact sheets.

- The CCOF Apprenticeship list at www.ccof.org includes CCOF clients who have indicated that they offer apprenticeships on their farm or at their operation. Some certified clients offer one or more of the following: room, board, wages, and the learning of a trade.
Description

- California Food, Land & People (CA FLP) is committed to educating Californians about the interdependence of food production, environmental quality, and the sustainability of human cultures.

- CA FLP’s Resources for Learning is a collection of 55 pre-K through 12th grade science- and social science-based lesson plans for use in either a formal or non-formal education setting. Twenty of the FLP lessons have been fully translated into Spanish.

- CA FLP offers two types of workshops to facilitate the use of Resources for Learning for formal and non-formal educators:
  ° Educator Workshop (6 hours)
  ° Facilitator Workshop (16 hours on two separate days)
California Food Policy Advocates (CFPA)
116 New Montgomery St., Suite 633
San Francisco, CA 94105
Phone: (415) 777-4422
www.cfpa.net

Description

- CFPA is a statewide public policy and advocacy organization dedicated to improving the health and well being of low-income Californians by increasing their access to nutritious and affordable food.

- CFPA employs a variety of strategies to develop and implement public policies that recognize the value of adequate nutrition and its fundamental contribution to good health and development, education and productivity. These strategies include:
  
  - Research that demonstrates the scope and nature of hunger in California and the efficacy of public and private food programs in mitigating it.
  - Development and promotion of strategies and programs to meet the nutrition needs of low-income communities and individuals.
  - Public education and advocacy to ensure the inclusion of nutrition in the formation and implementation of sound public policy.
  - Technical assistance, training and support to low-income communities in their efforts to identify and overcome hunger and hunger-related deficiencies.
  - Collaboration, through conferences, communication and coalition-building, among food program providers and other community-based organizations throughout California to facilitate their working together to mitigate hunger and poverty.

- The CFPA website offers data, research and reports on food and nutrition programs, updates on state and federal legislation and advocacy efforts, as well as outreach materials on food assistance programs.
Description

- The California Foundation for Agriculture in the Classroom (CFAITC) works with K–12 teachers, students, and community leaders, to enhance education using agricultural examples. The goal of CFAITC is the increase awareness and understanding of agriculture among California educators and students to help them make informed decisions.

- The CFAITC sponsors a conference each year with keynote presenters, workshops, exhibits, local farm and food tours.

- The CFAITC website includes downloadable fact sheets, activity sheets and teacher guides.
Description

- CPR is a statewide coalition of more than 175 organizations, founded in 1996 to shift fundamentally the way pesticides are used in California. CPR’s mission is to protect public health, improve environmental quality and expand a sustainable and just agriculture system by building a diverse movement across California to change statewide and local pesticide policies and practices.

- CPR has built a diverse, multi-interest coalition, including public health, children’s health, educational and environmental advocates, clean air and water organizations, health practitioners, environmental justice groups, labor, organizations, farmers and sustainable agriculture advocates.

- Members are actively engaged through a unifying four point platform:
  1) eliminate use of the most dangerous pesticides;
  2) reduce use of and reliance on all pesticides;
  3) support safer, ecologically sound and socially just forms of pest management; and
  4) expand and protect the public's right to know about pesticide use, exposure, and impacts.

- The CPR website includes publications on pesticides and its effects on air, water and human health, action alerts on pending legislation and press, community action alerts, and a newsletter.
Description

- The Center for Ecoliteracy is dedicated to fostering a profound understanding of the natural world, grounded in direct experience and leading to sustainable patterns of living. The Center recognizes food systems and watersheds as essential systems that provide meaningful contexts for achieving ecological literacy.

- The Center works with schools on projects that take school children out of the classroom and into the natural world. The Center for Ecoliteracy website includes publications on education for sustainability, an online resource guide entitled *Rethinking School Lunch*, and an ongoing essay series.
Center for Food and Justice (CFJ)

Mailing address:
Urban & Environmental Policy Institute, Occidental College
1600 Campus Road, M-1
Los Angeles, CA 90041

Physical address:
2106 Colorado Blvd.
Los Angeles, CA 90041
Phone: (323) 341-5092
http://departments.oxy.edu/uepi/cfj/

Description
• The Center for Food and Justice (CFJ) is a division of the Urban & Environmental Policy Institute (UEPI) at Occidental College. With its vision of a sustainable and socially just food system, CFJ engages in collaborative action strategies, community capacity-building, research, and education.

• Activities of the Center include (1) Development and institutionalization of innovative programs, (2) Grassroots organizing and coalition-building, (3) Research, evaluation, and policy analysis, and (4) Training and technical assistance.

• Key Programs include the following:
  o National Farm to School Program
  o California Farm to School Program
  o Compton Farm to School Demonstration Project
  o Project CAFÉ (Community Action on Food Environments)
  o Los Angeles Healthy School Food
Center for Urban Education about Sustainable Agriculture (CUESA)
One Ferry Building - Suite 50
San Francisco, CA 94111
Phone: (415) 291-3276
www.cuesa.org

Description

- CUESA’s mission is to promote regional sustainable agriculture through the operation of farmers' markets and educational programs, support regional producers, especially small sustainable family farms, connect urban residents and regional sustainable farmers, and educate consumers about sustainable practices.

- CUESA operates the weekly farmers’ market at the Ferry Building on Tuesdays (10:00am – 2:00pm), Thursdays (4:00pm – 8:00pm - seasonal), Saturdays (8:00am – 2:00pm), and Sundays (10:00 am – 2:00pm - seasonal).

- CUESA’s Shop with the Chef program offers recipes, cooking demonstrations, and tastings from local chefs and producers on Saturday mornings.

- CUESA’s E-letter provides a list of upcoming educational events, produce highlights, and a feature article each week via email.
Community Alliance with Family Farmers (CAFF)

Mailing address:
P.O. Box 363
Davis, CA 95617

Physical address:
36355 Russell Blvd.
Davis, CA 95616

Phone: (530) 756-8518
www.caff.org

Description
- CAFF is building a movement of rural and urban people to foster family-scale agriculture that cares for the land, sustains local economies and promotes social justice.

- CAFF’s Community Food Systems/Economic Options for Family Farmers program connects consumers to food producers providing information, access and education through practical, community driven projects.

- CAFF’s Biological Farming Program builds and supports communities of farmers, agricultural professionals, and public institutions dedicated to the voluntary adoption of a whole systems approach to farm management.

- CAFF produces a wide variety of acclaimed publications. The *Agrarian Advocate* provides timely reporting on CAFF program and policy work. *Farmer to Farmer* provides monthly reports on topics of discussion at Lighthouse Farm Network meetings and field days throughout the State, where farmers share technical information and support to all those interested in biologically-based farming practices.
A community food assessment is a participatory and collaborative process that examines a broad range of food-related issues and resources in order to inform actions to improve a community’s access to healthy food. These assessments typically entail the collection of data in order to determine whether households in a community have access to sufficient, nutritionally adequate, and culturally appropriate foods to satisfy their dietary needs. Although federal nutrition and agricultural policies play a key role in community food security, many decisions that affect a community’s food system are made at the local level, including funding allocations, open space planning, program development, and outreach.

Why do a Community Food Assessment?

- Identify food system and other deficiencies that face the community
- Inform decision-making, public policy and actions around the food system
- Improve program development and coordination
- Increase community participation in projects and in shaping the food system
- Build communities’ capacity to create positive change
- Ensure that projects respond to community resources and needs
- Help articulate a vision of what needs to get done in the community and how to set priorities and goals to improve the local food system
- Identify potential partners, community resources, and opportunities
- Build new and stronger networks, partnerships, and coalitions
- Provide data that can be used in future proposals and reports
- Establish a long-term monitoring system with a clear set of indicators
- Organize information in a way that policy makers and funders will understand and respond to
- Enhance visibility, awareness and understanding of food-related issues

For more information about Community Food Assessments in San Francisco, see: http://www.sffoodsystems.org/pages/research.html

For more information about Community Food Assessments in California and the rest of the U.S., see: http://foodsecurity.org/cfa_home.html
**Description**

- CFSC is a coalition of over 250 member organizations. CFSC is dedicated to building strong sustainable, local and regional food systems that ensure access to affordable, nutritious and culturally appropriate food for all people at all times.

- The Community Food Projects Program was passed as part of the 1996 Farm Bill, and established a competitive grants program to make funds available to support projects "designed to meet the food needs of low-income people, increase the self-reliance of communities in providing for their own food needs, and promote comprehensive, inclusive, and future-oriented solutions to local food, farm, and nutrition problems." The Community Food Projects Program is authorized for $16 million over the course of seven years. In the program's first year, thirteen organizations from Maine to Hawaii received $1 million in funding for FY 1996. $2.5 million will be available for FY 1997.
Description

- Since 1969, the Ecology Center has been addressing the public’s need for unbiased, non-commercial information about household products, ecologically-sensitive methods of living, and large toxic threats to society and alternatives to those threats.

- The Ecology Center sponsors the following projects:
  - A resource center which is free and open to the public, providing books, videos and other information on environmental issues, primarily in the Bay Area
  - An information hotline on environmental issues
  - Environmental classes onsite
  - An Ecology Center Store
  - Curbside Recycling for Berkeley households
  - Berkeley Farmers’ Market
  - Farm Fresh Choice
Food Research and Action Center (FRAC)
1875 Connecticut Ave., NW Suite 540
Washington, DC 20009
Phone: (202) 986-2200
www.frac.org

Description

• FRAC is a leading national organization working to improve public policies to eradicate hunger and under nutrition in the United States. FRAC is a nonprofit and nonpartisan research and public policy center that serves as the hub of an anti-hunger network of thousands of individuals and agencies across the country.

• FRAC conducts ground-breaking research to document the extent of hunger and its impact on low-income families with children.

• FRAC reviews and analyzes the major developments at the national level that affect food assistance programs — legislation, regulations and major reports and proposals. FRAC also monitors the implementation of these laws and serves as a watchdog of regulations and policies affecting the poor.

• FRAC provides coordination and support to a nationwide anti-hunger network of advocates, food banks, program administrators and participants, policy makers and others.

• FRAC serves as a clearinghouse for national and local organizations seeking information and analyses about hunger and anti-hunger programs. FRAC develops media and public information campaigns to help promote changes in public attitudes and policies, and acts as an authoritative source of information on hunger for the news media and public officials.
Literacy for Environmental Justice (LEJ)
6220 Third Street
San Francisco, CA 94124
Phone: (415) 508-0575
www.lejyouth.org

Description

- The mission of LEJ is to foster an understanding of the principles of environmental justice and urban sustainability in young people in order to promote the long-term health of their communities.

- LEJ engages urban youth (primarily from Bayview Hunters Point and the surrounding communities of Mission, Potrero Hill, Visitacion Valley, and Excelsior) in traditional environmental problems by drawing concrete linkages between the state of human health, the environment, and urban quality of life.

- LEJ’s Youth Envision Project employs and trains high school-aged youth as community organizers around Bayview's food security and environmental justice initiatives, in partnership with the Department of Public Health. Youth participate in an intensive program that includes: Community-based needs assessments, Nutrition & cooking education, Merchant education, Consumer education, Public advocacy, Partnership building and Workshop facilitation for both youth and adults.

- The Good Neighbor Project is a collaboration between LEJ, SF Environment, the Department of Public Health, the African American Health Taskforce, SF Power Co-op, and the Mayor’s Office to create a pilot economic incentive program for Bayview merchants who agree to increase their store stock of healthier foods by 20%.
Description

- PANNA (Pesticide Action Network North America) works to replace pesticide use with ecologically sound and socially just alternatives. As one of five Regional Centers worldwide, PANNA links local and international consumers, labor, health, environment and agriculture groups into an international citizens' action network. This network challenges the global proliferation of pesticides, defends basic rights to health and environmental quality, and works to insure the transition to a just and viable society.

- The PANNA online resource library offers a collection of reports, articles, guides, videos, and links. Descriptions and resources for specific campaigns and projects are listed.

- The online Pesticide Database is a one-stop location for current toxicity and regulatory information for pesticides.
Description

- SF Environment provides information on recycling, composting, energy use, toxics reduction, environmental justice, and environmental policy.

- The SF Environment website provides fact sheets, articles and press releases, a calendar of relevant events and meetings, as well as a directory of “green services.” Information is also posted regarding the department’s community grants in the areas of environmental justice, waste prevention and recycling.

- SF Environment’s Food to Flowers! Program teaches students to compost at school using the green cart system. SF Environment staff visits local schools to educate students about the interconnectedness of nature and how simple actions like recycling and composting can help protect the environment. Free teaching and display materials are provided to each school, along with a special visit from Phoebe the Phoenix – SF Environment’s school mascot.
FOOD SYSTEMS, ADVOCACY, AND AGRICULTURE
EDUCATION AND ADVOCACY

San Francisco Food Systems
c/o San Francisco Department of Public Health (Environmental Health Section)
1390 Market Street, Suite 822
San Francisco, CA 94102
Phone: (415) 252-3937
www.sffoodsystems.org

Description
• San Francisco Food Systems is engaged in a number of activities that bridge people to healthy, nutritious, affordable, locally and regionally grown food. Actions and activities of San Francisco Food Systems include community research, community and institutional capacity building, promotion of collaborations and partnerships, policy activities, and advocacy.

• Current projects include the following:
  ◦ Assessing and altering the school food environment
  ◦ Promoting acceptance and usage of food assistance at farmers’ markets
  ◦ Coordinating the San Francisco Food Alliance
  ◦ Preparing GIS maps of food resources in San Francisco
San Francisco Green Schoolyard Alliance (SFGSA)
c/o San Francisco Beautiful
564 Market Street, Suite 709
San Francisco, CA 94104
www.sfgreenschools.org
Email: sfgsa@ecoschools.com

Description
• The SFGSA promotes inclusive, community driven processes that create and maintain healthy, environmentally sustainable learning environments in San Francisco's schools. SFGSA envisions a future in which each school operates in concert with its neighborhood and local ecology to foster academic achievement, environmental stewardship, creativity, and community building.

• SFGSA has quarterly planning, networking, and information sharing meetings.

• SFGSA sponsors a mini-grants program for supplies/materials and gardening tools that will be used to create or enhance an outdoor learning environment at publicly funded San Francisco schools.

• SFGSA organizes a Green School Grounds Conference for teachers and community members, combining hands-on workshops on changing schoolyards into living outdoor classrooms with sessions showing how to connect these activities to California’s K-12 curricula.
Sustainable Agriculture Education (SAGE)
1417 Josephine Street
Berkeley, CA 94703
Phone: (510) 526-1793
www.sagecenter.org

Description
- The mission of SAGE is to broaden the constituency for sustainable regional food and agriculture by developing projects, programs, and materials that help the public understand and enjoy sustainable agriculture's many benefits. Dedicated to the principle of health through diversity, SAGE helps articulate vision and inspires informed action through entrepreneurial, collaborative approaches.

- Goals of SAGE include the following: (1) To foster and support innovative projects linking urban and rural places; (2) To demonstrate the connections between community health, sustainable agriculture, metropolitan infrastructure and growth, housing, and regional land use planning; and (3) To link urban community food security needs with the needs of sustainable family farmers.

EDUCATION AND ADVOCACY

University of California Cooperative Extension (UCCE),
San Francisco/San Mateo Counties
80 Stone Pine Road, #100
Half Moon Bay, CA 94019
Phone: (650) 726-9059
http://cesanmateo.ucdavis.edu/

Services Description
• 4-H Youth Development Program
  4-H's learn-by-doing, youth-adult partnerships, and research-based educational programs help young people discover and develop their potential.

• Richard J. Elkus Ranch
  The Richard J. Elkus Ranch is a working ranch located on the central California coast in Half Moon Bay, San Mateo County.

• Agriculture
  Educational and research programs that assist the agricultural community (growers, industry, agencies and the public) in local crop production, pest management, postharvest handling, water quality, watershed protection, and environmental protection.

• Home Gardening/Public Information
  Providing research and educational support to amateur gardeners.

• Landscape Horticulture/Urban Forestry
  Educational programs and research that support city and county parks, green space managers, street tree programs, commercial tree and landscape professionals and nonprofit environmental groups.

FARM TO CONSUMER

Alternative Food Projects:
Reconnecting Eaters and Farmers

Americans are increasingly concerned about the quality of their food - knowing where their food comes from and how it is grown. Many are worried about the loss of small farms and the consolidation of food system into the control of a few multinational organizations. Others are alarmed about food safety issues due to well publicized food contaminations such as the E. coli outbreak from Jack in the Box, recalls of Taco Bell corn taco shells due problems with the genetically engineered StarLink corn, and the discovery of mad cow disease in American grown cows. Rising levels of obesity and diet related diseases have also brought a new level of awareness of the need for healthy eating habits along with access to high quality food.

There is a movement globally to develop alternative food networks that directly reconnect eaters and farmers. In the U.S., these projects have taken many forms from farmers’ markets, community supported agriculture, cooperative buying clubs, community gardens and other community food projects. Below are two guides that describe successful alternative food projects in the U.S.

A Guide to Community Food Projects (CFP)
The CFP program is a federal grant administered by the USDA that supports projects designed to: help meet the food needs of low-income people; increase the self-reliance of communities in providing for their own food needs; and promote comprehensive responses to local food, farm, and nutrition issues. Additionally, projects are encouraged to: support the development of entrepreneurial projects; develop linkages between the for-profit and non-profit sectors, as well as between other sectors of the food system; and foster long-term food planning activities and multi-system, interagency approaches. These projects have included nutrition education, food policy councils, community gardening, youth gardening, community supported agriculture, farm to school programs, farmers’ markets, micro-enterprise campaigns, business training, community kitchens, and training and technical assistance. See: http://www.foodsecurity.org/cfsc_case_studies.pdf

Weaving the Food Web
Weaving the Food Web is a story of California’s food system. It traces the efforts of communities across the state to help people put fresh, healthy food on their tables every day. It describes the kinds of relationships among individuals, families, and businesses. This photo-rich, 21-page booklet features eight innovative community-based food projects drawn from around California. See: http://www.foodsecurity.org/pubs.html#food_web
Community Supported Agriculture (CSA)

Community Supported Agriculture (CSA) is a structure in which an individual, family, or group buys a “share” of the eventual harvest from a farm or a group of farms. In this way, the person or group is supporting the farm and taking on some of the risk and benefits from a regular box of the bounty. Subscribers usually receive a weekly box of produce including fruits, vegetables, and herbs and typically recipes and news from the farm. Sometimes subscribers are also invited to visit or volunteer on the farm. Included here is a list of CSA programs that deliver to San Francisco.
