Collaborative Learning for Life

enroll overview

About us

Enroll began in June 2012 after a community outreach project with underprivileged youth. It became clear that many disadvantaged kids – those from low income families, kids with divorced parents, children living in foster homes and orphanages – are not afforded the same opportunity to discover their own strengths and prepare for their future. Many of them don't have a support system. They get lost in an over-crowded public education system. It is often all they can do to make it to the finish line of their high-school graduation.

With an awareness of the potential advancements made possible by recent technological developments, we have developed an innovative strategy to build a true collaborative learning environment. Our company is based on a desire to unify the disjointed education landscape in order to create a portal that would help students build a support system, enable parents to stay in the loop regarding their children's education and allow involved teachers to actively participate in their students' learning.

Enroll combines a team of entrepreneurs, educators, project managers, communications experts, business development specialists, dynamic software developers, social networking software experts, parents and involved community members.

enroll overview

Vision

Enroll holds a vision of a collaborative global learning ecosystem that facilitates every type of interaction between students, parents, educators, learning support personnel and education focused organizations.

Mission

We leverage advanced technology in order to deliver a distinct advantage to the world of education. Our mission is to:

❖ Encourage a lifelong learning philosophy.

❖ Educate students of all levels according to individual needs in order to assist with academic goals.

❖ Empower users to take control over their own success as students, parents and educators.

❖ Engage participants with unique social networking tools that facilitate support system development.

❖ Enable every participant to access all the resources and tools necessary to further their education.

❖ Equalize the playing field for all students, educators and educational organizations, regardless of condition.

enroll overview

Features

- Most holistic platform to connect professionals, teachers, parents, education-focused orgs and institutions with students.

- Is built mobile ready, so that from the Sahara to Amsterdam, a village in Vietnam to a café in Manhattan, participants have the access they need
